C2 DEFENCE ASSESSMENT

C2.1 Introduction

The Defence Assessment provides a summary of the type and condition of existing defences along the North Solent SMP frontage together with an assessment of residual life. Local Authority bespoke in-house database systems were collated to populate the defence assessment. These were delivered to the Shoreline Management Plan team in different formats which were then streamlined into a Geographical Information System. In addition, different authorities applied different categories and descriptions for logging defence type, which again, were simplified into key defence types for the defence assessment. For some frontages, it was evident that private defences had not been inspected by the Operating Authorities, were not up-to-date, or had not been inspected at all, e.g. the flood defences on the west side of Southampton Water. An estimate of the defence type was made by the Shoreline Management Team for this frontage. Any remaining defences without asset condition information are identified.

An assessment of residual life under an NAI policy was undertaken using available asset inspection data from table 2.1 below (from the 2004 Procedural Guidance, Volume 3) as a guide.

Defence description	Estimate of residual life (years) under NAI policy				
	Existing defence condition grade				
	Grade 1	Grade 2	Grade 3	Grade 4	Grade 5
Seawall (concrete/rock)	25-35	15-25	10-15	5-7	0
Revetment (concrete/rock)	25-35	15-25	10-15	5-7	0
Timber groynes and other timber structures	15-25	10-20	8-12	2-7	0
Gabion	10-25	6-10	4-7	1-3	0
<i>Note: Grade 5 is not used in the Coast Protection Survey of England, but is included here as a measure of failure.</i>					

Table 2.1: Estimate of deterioration for assessment of residual life for example structures (Defra's SMP Guidance 2006, Appendix D)

The location, type, residual life and condition of existing known defences, as well as a spreadsheet summarising the information is presented in Annex C2.1. It is important to note that some private shoreline structures that currently prevent flooding or erosion may have been classified as a flood or coastal defence at the SMP scale, although this is not their primary purpose. The maintenance of these structures has not been funded through flood and coastal defence grant in aid

and therefore the structures have not been designed to provide a specific standard of protection. Planners and developers should refer to existing coastal defence strategies or the emerging flood and coastal erosion risk management strategies for more detailed information on the distinction between these structures and flood and coastal defences.

The total length of shoreline considered by the North Solent SMP is approximately 386km, extending from Hurst Spit to Selsey Bill including the Rivers Beaulieu, Itchen and Hamble, Southampton Water and Portsmouth, Langstone and Chichester Harbours. Table 2.2 indicates the proportion of shoreline and defence maintenance responsibility within the North Solent SMP frontage. Table 2.3 summarises the key maintenance responsibility, which indicates the proportion of defences for which maintenance or improvement works are or are not eligible for public funding. Maps showing the maintenance responsibility and coastal landownership are presented in Annex C2.2.

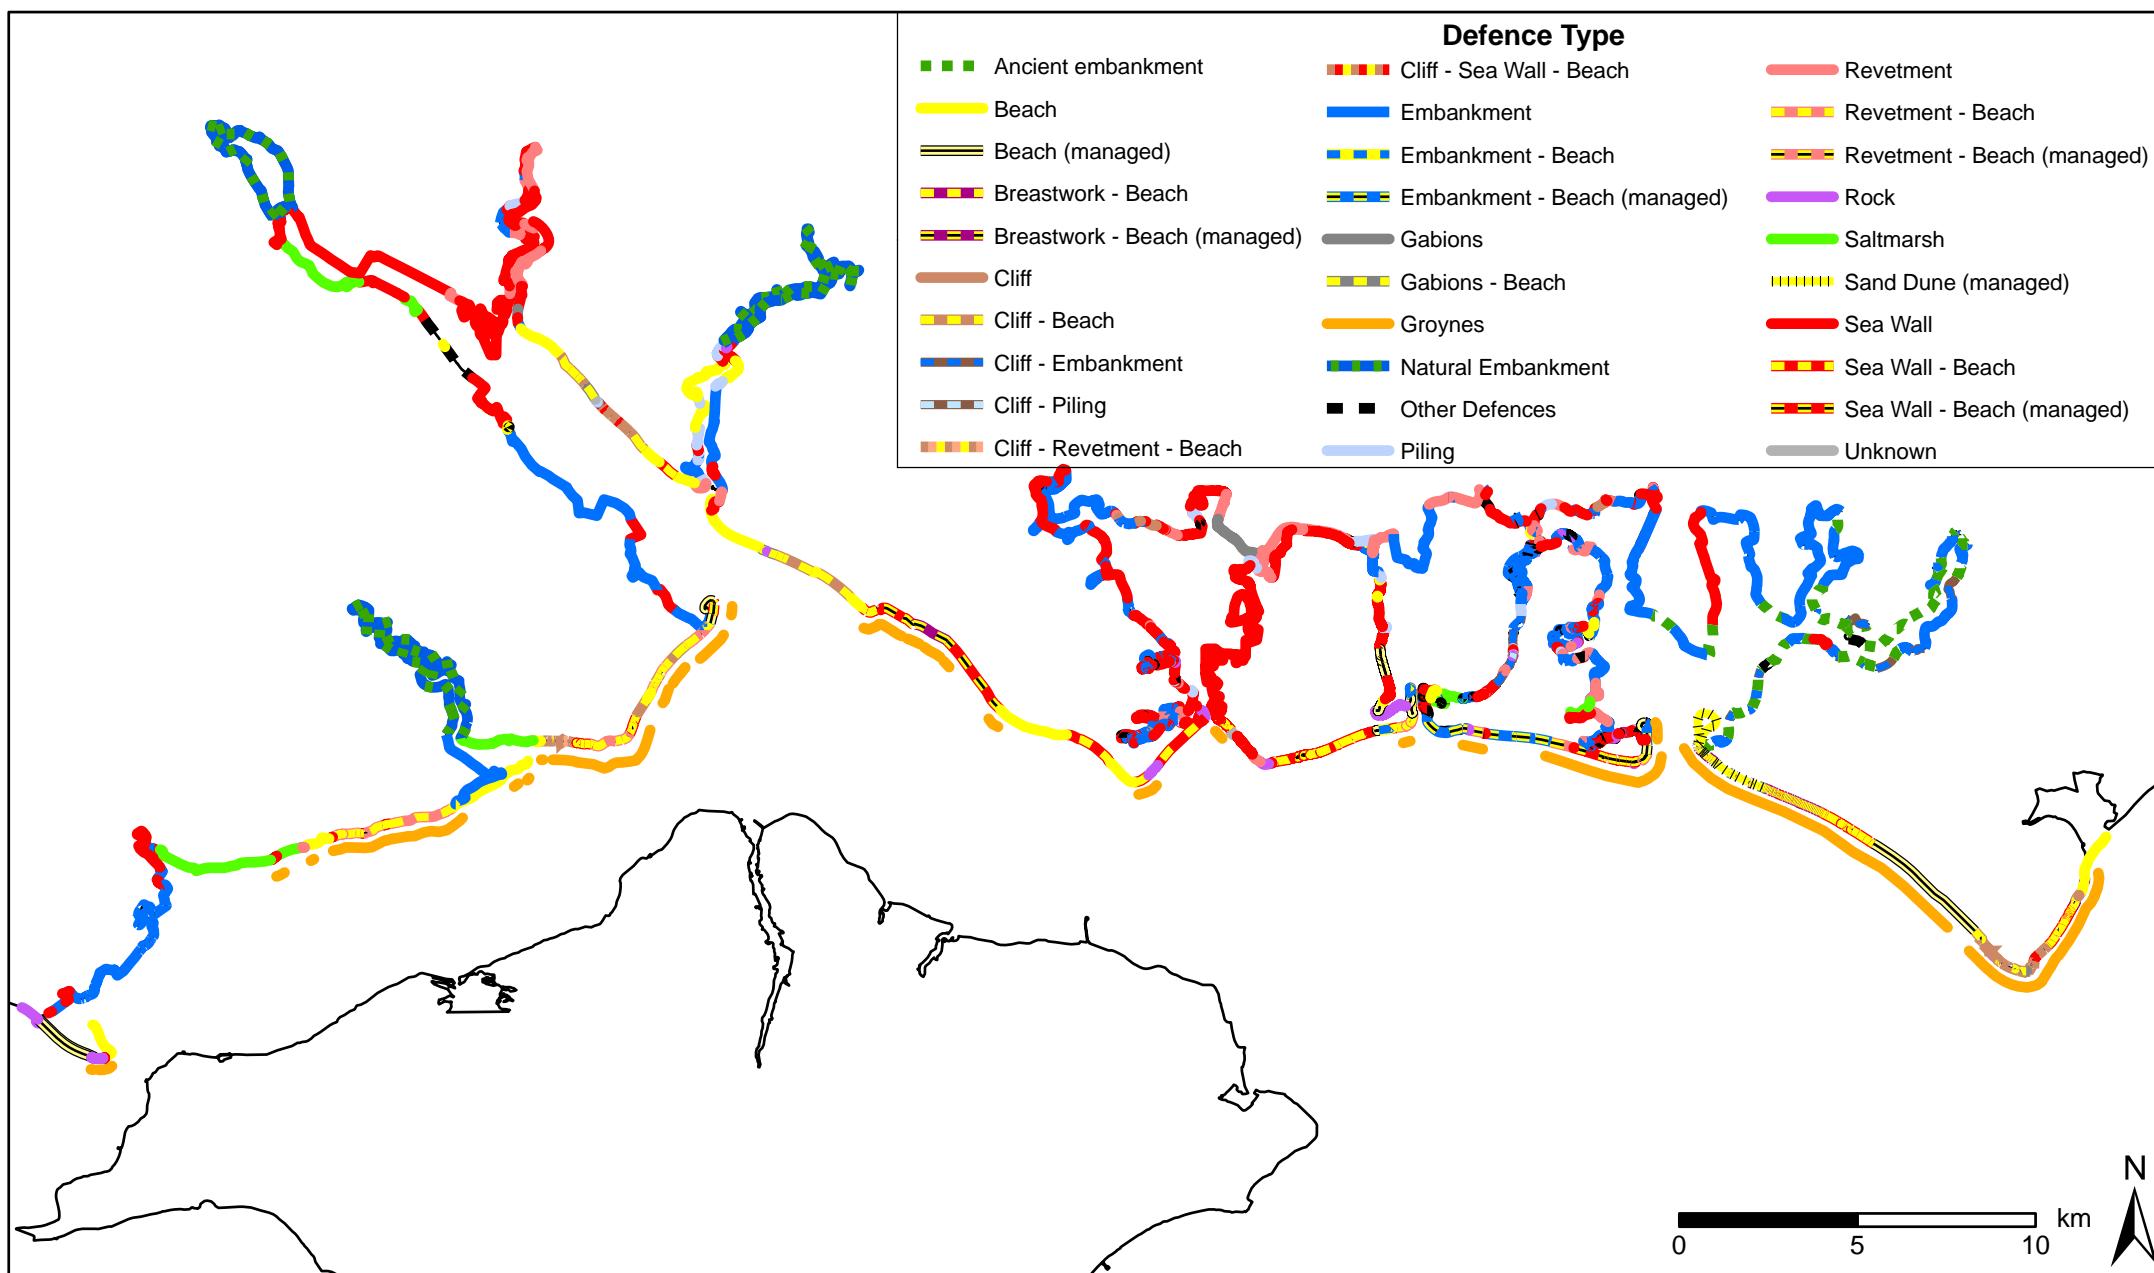

Landowner / Maintainer	% of responsibility	Length of Shoreline (km)
Private (individuals and companies)	50.6	187.7
Local Authorities	21.9	81.4
Environment Agency	11.9	44.3
Ministry of Defence	8.6	32.1
Associated British Ports	3.6	13.4
Hampshire County Council	1.5	5.6
Highways Agency	1.1	4.3
English Heritage	0.6	2.4

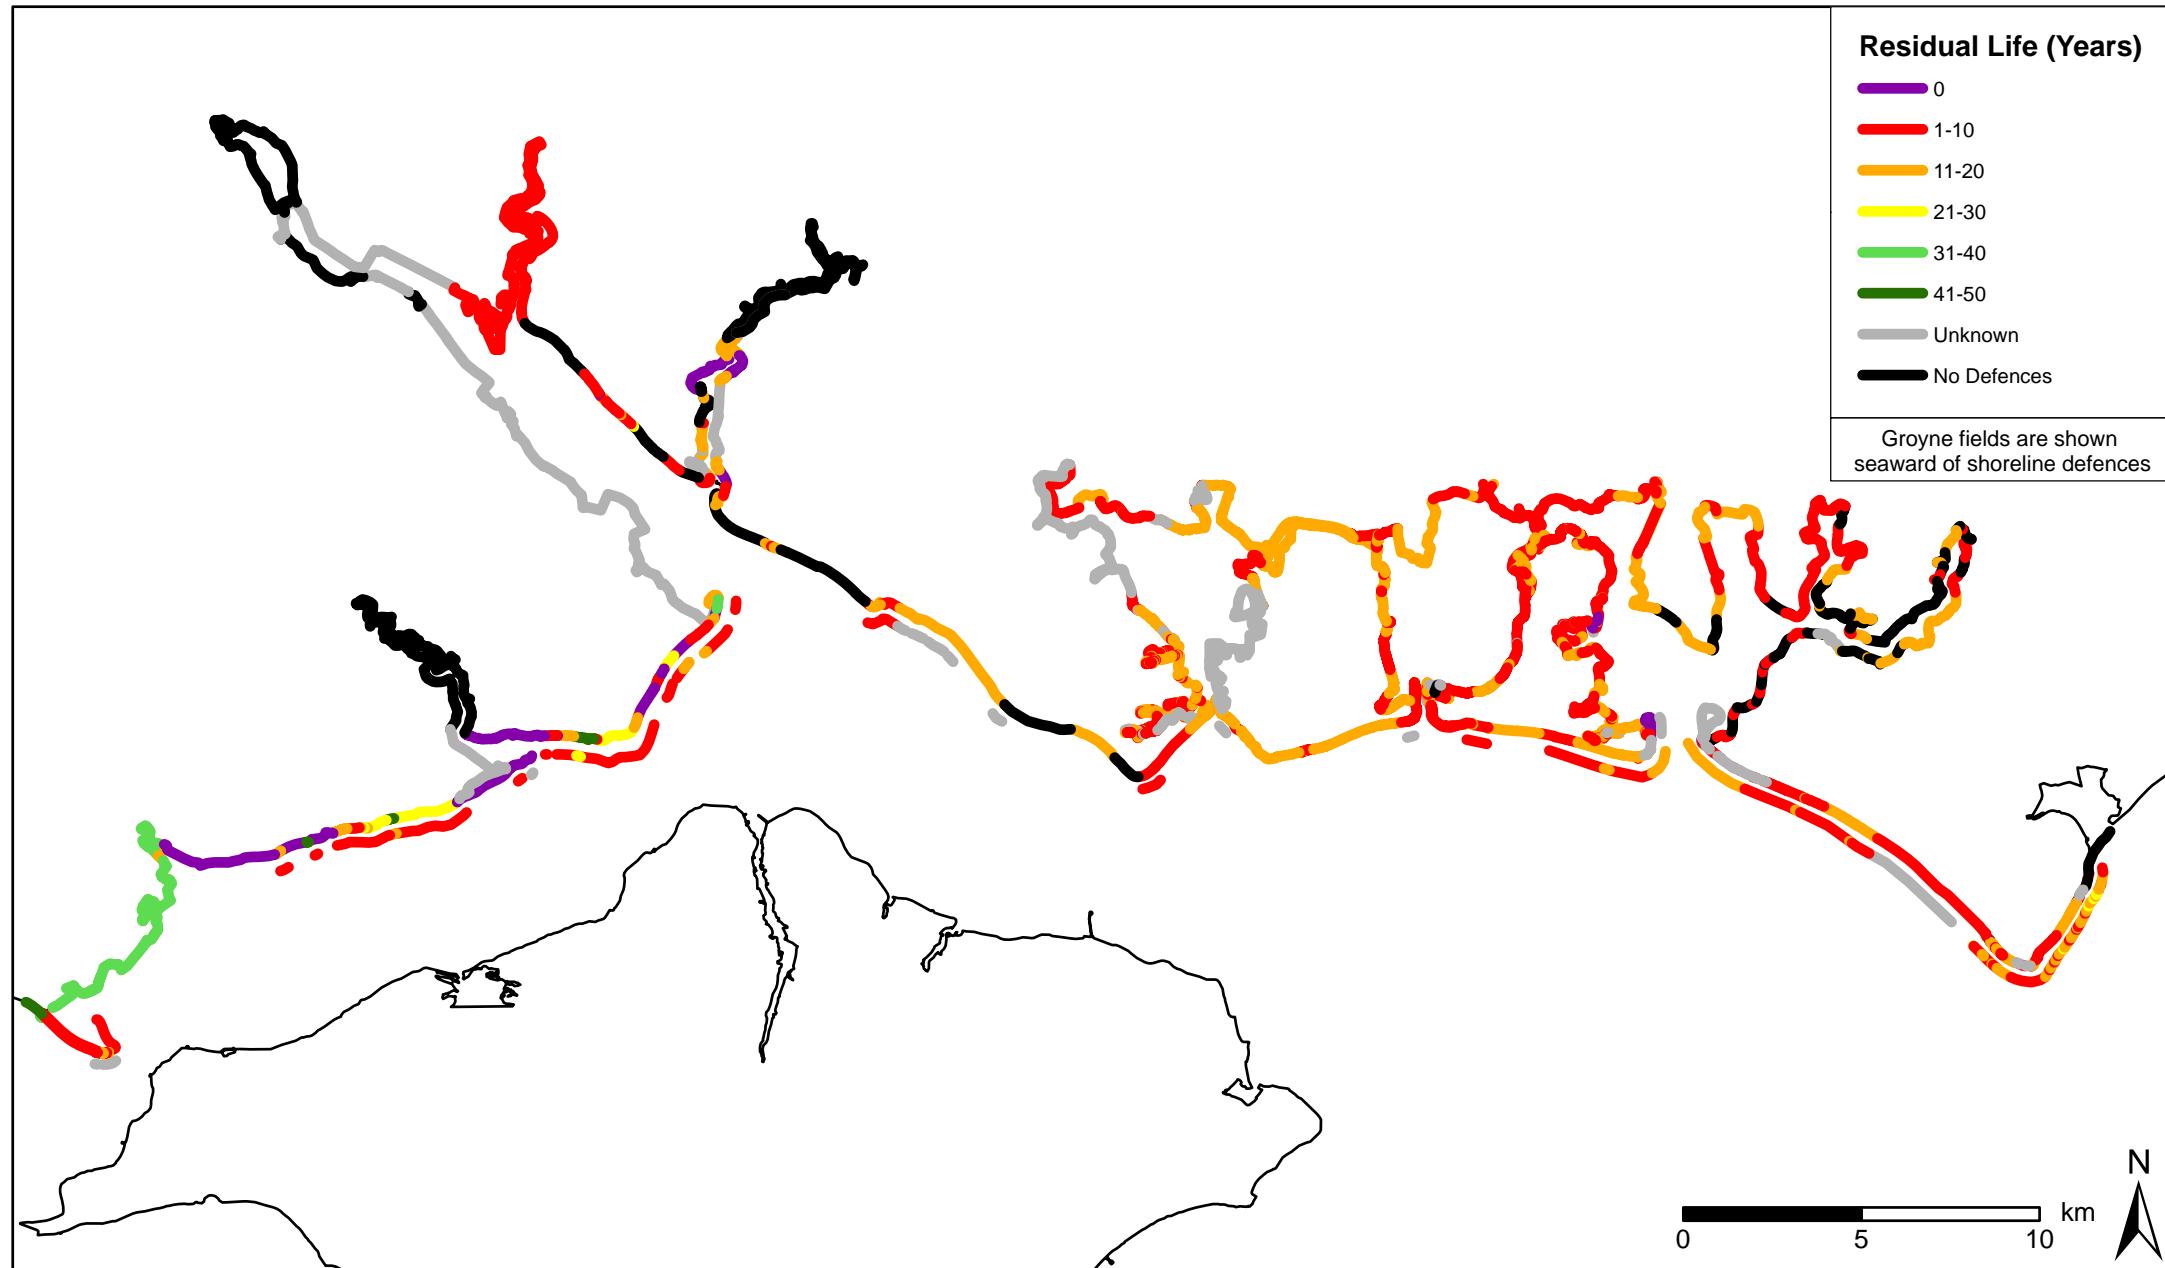

Table C2.2: Detail of Maintenance Responsibility

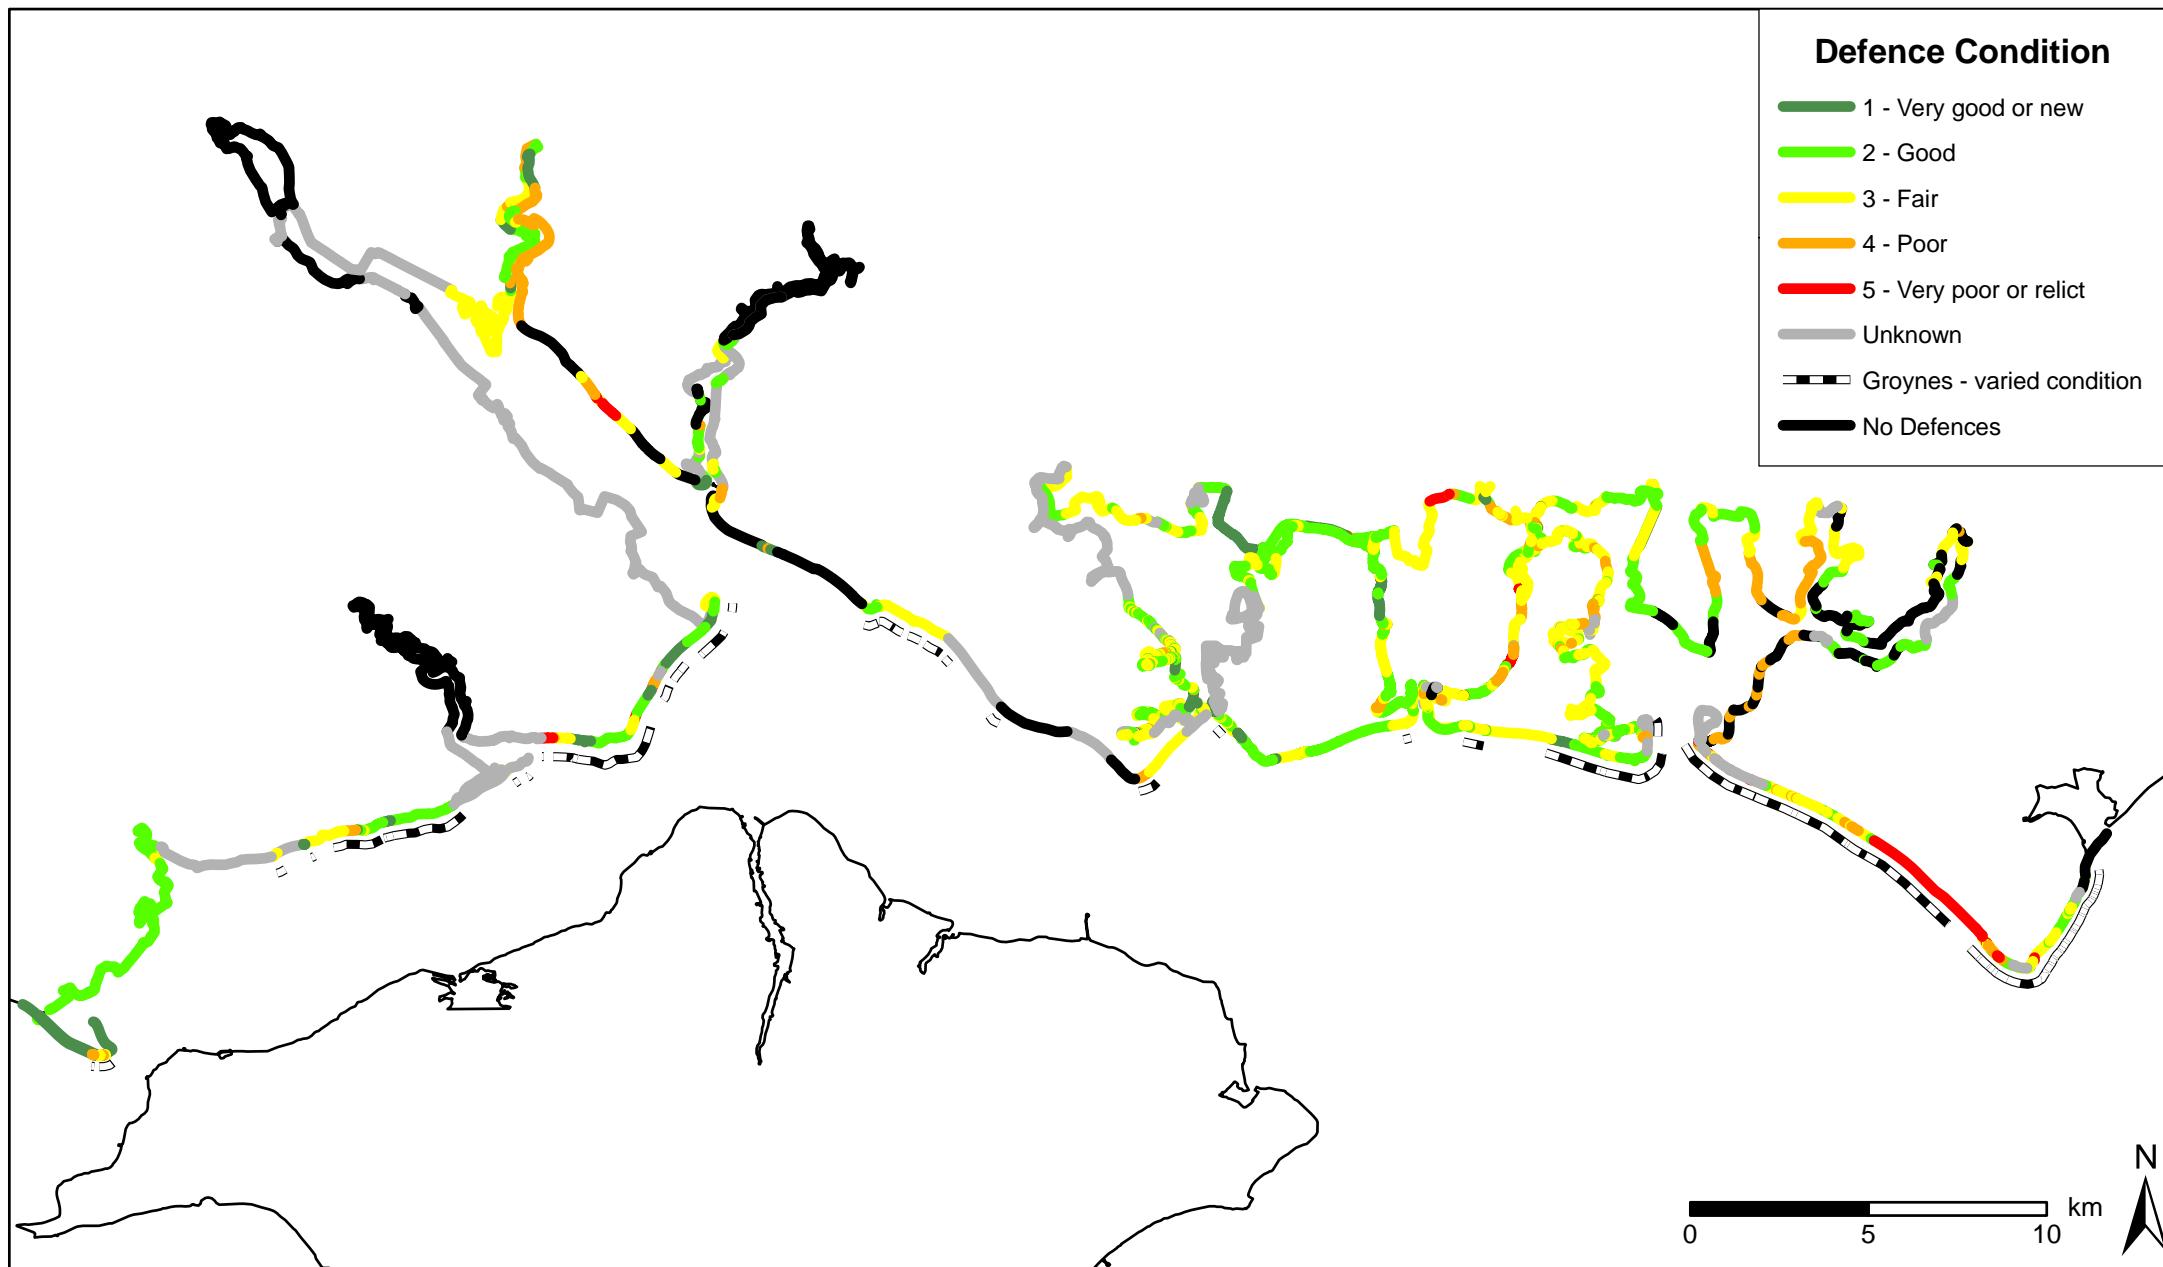

Landowner / Maintainer	% of responsibility	Length of Shoreline (km)
Private individuals, companies, or County Councils where public funding from Flood and Coastal Defence Grant In Aid is <u>not</u> eligible for maintenance or improvements to existing defences.	56	206
Operating Authorities (Maritime Local Authorities and Environment Agency)	31	115
Other Govt agencies (e.g. MoD, Highways Agency, English Heritage) where public funding <u>is</u> eligible for maintenance or improvements to existing defences	13	50

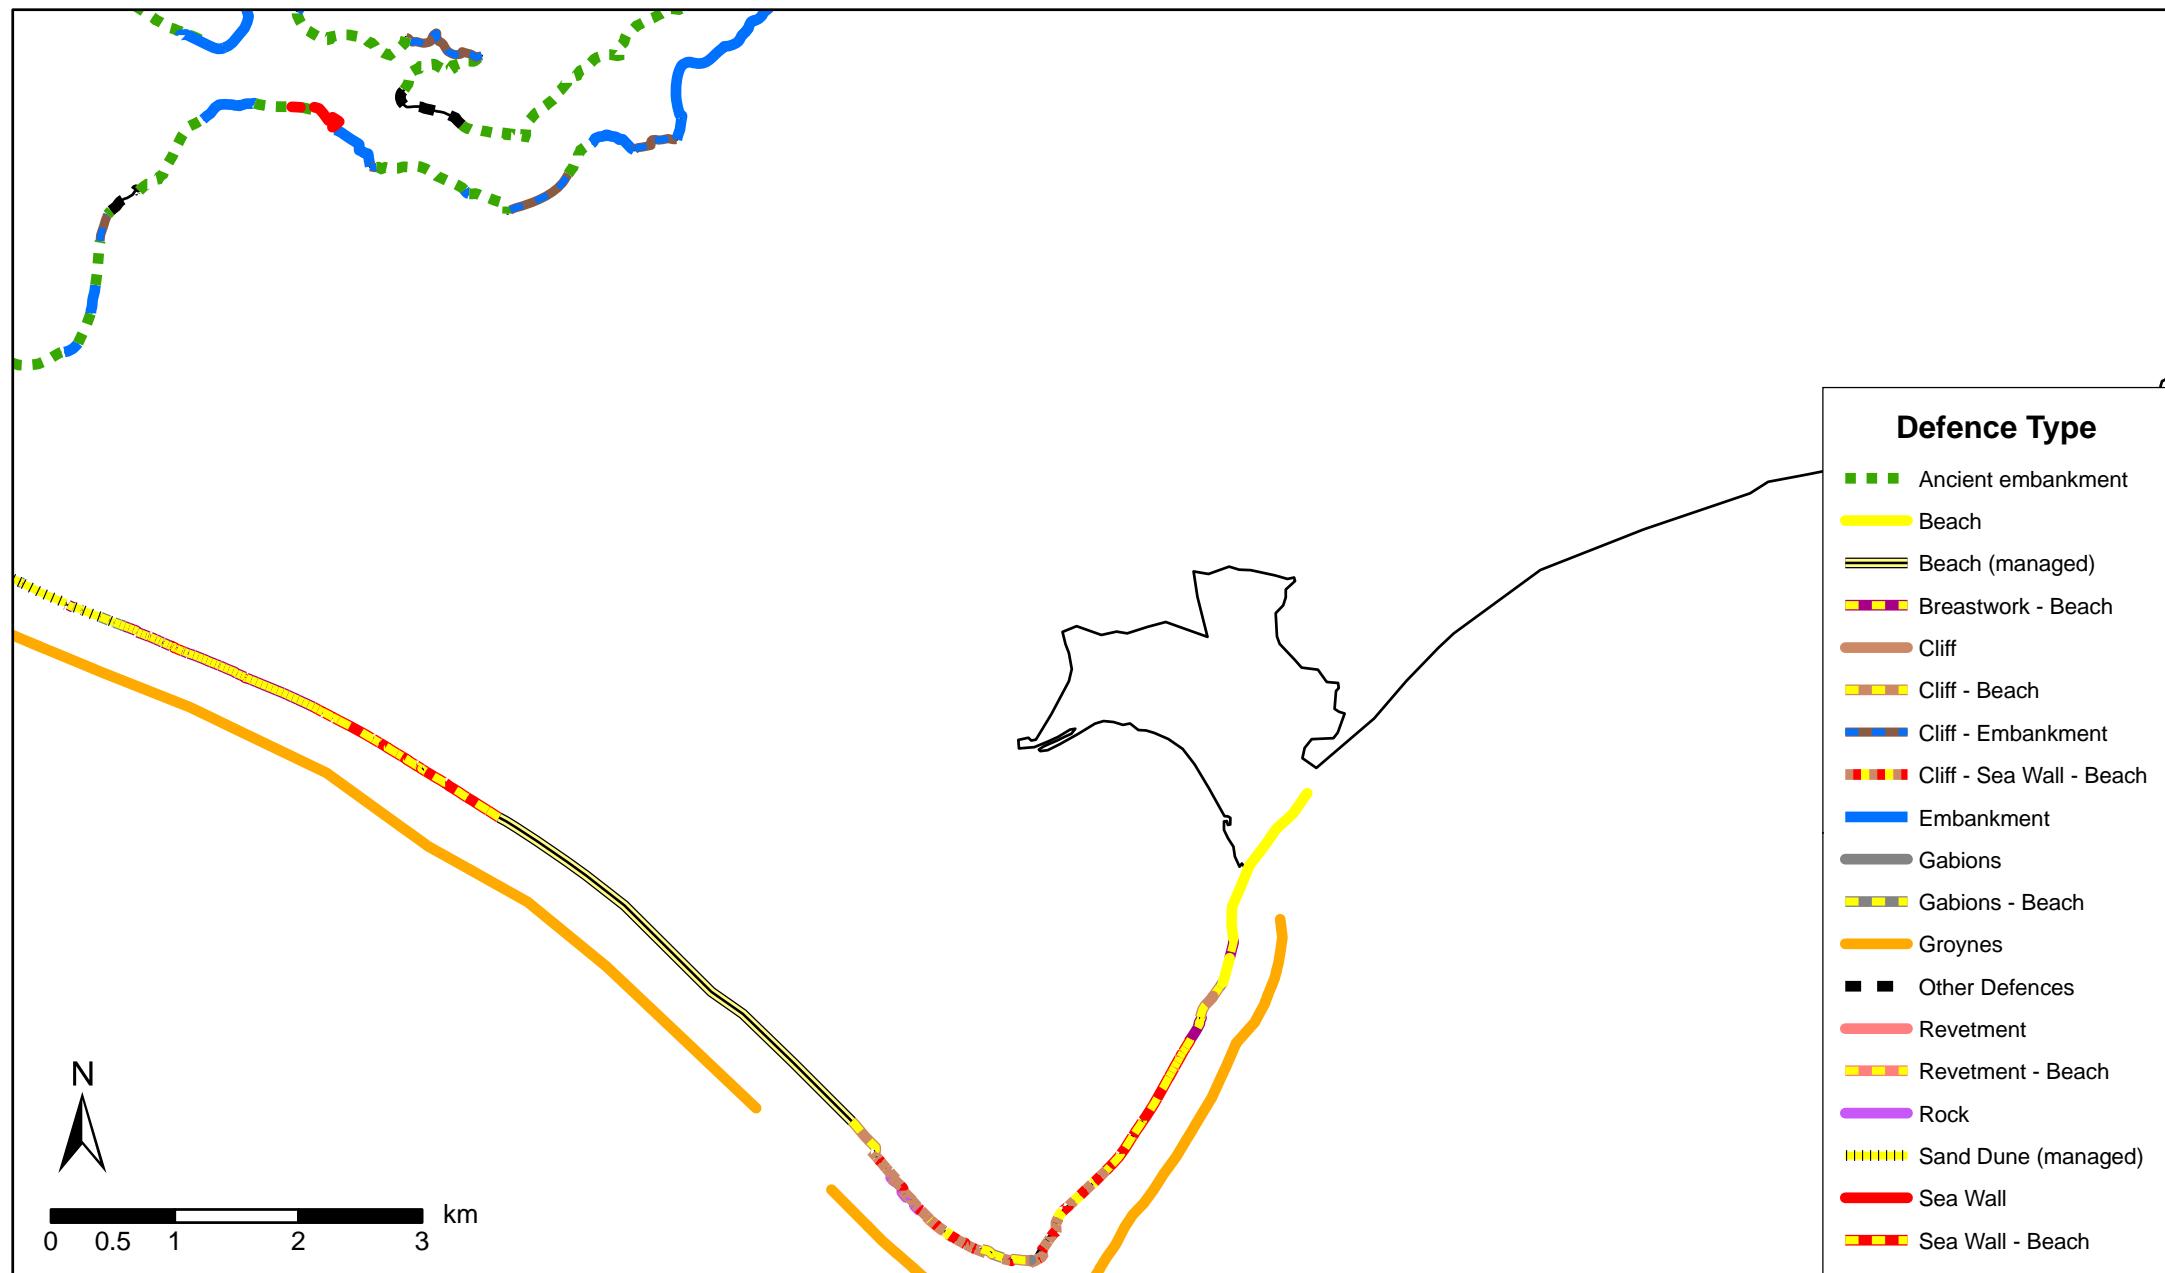

Table C2.3: Key Types of Maintainer Responsibility

ANNEX C2.1 LOCATION, TYPE, RESIDUAL LIFE AND CONDITION OF EXISTING KNOWN DEFENCES

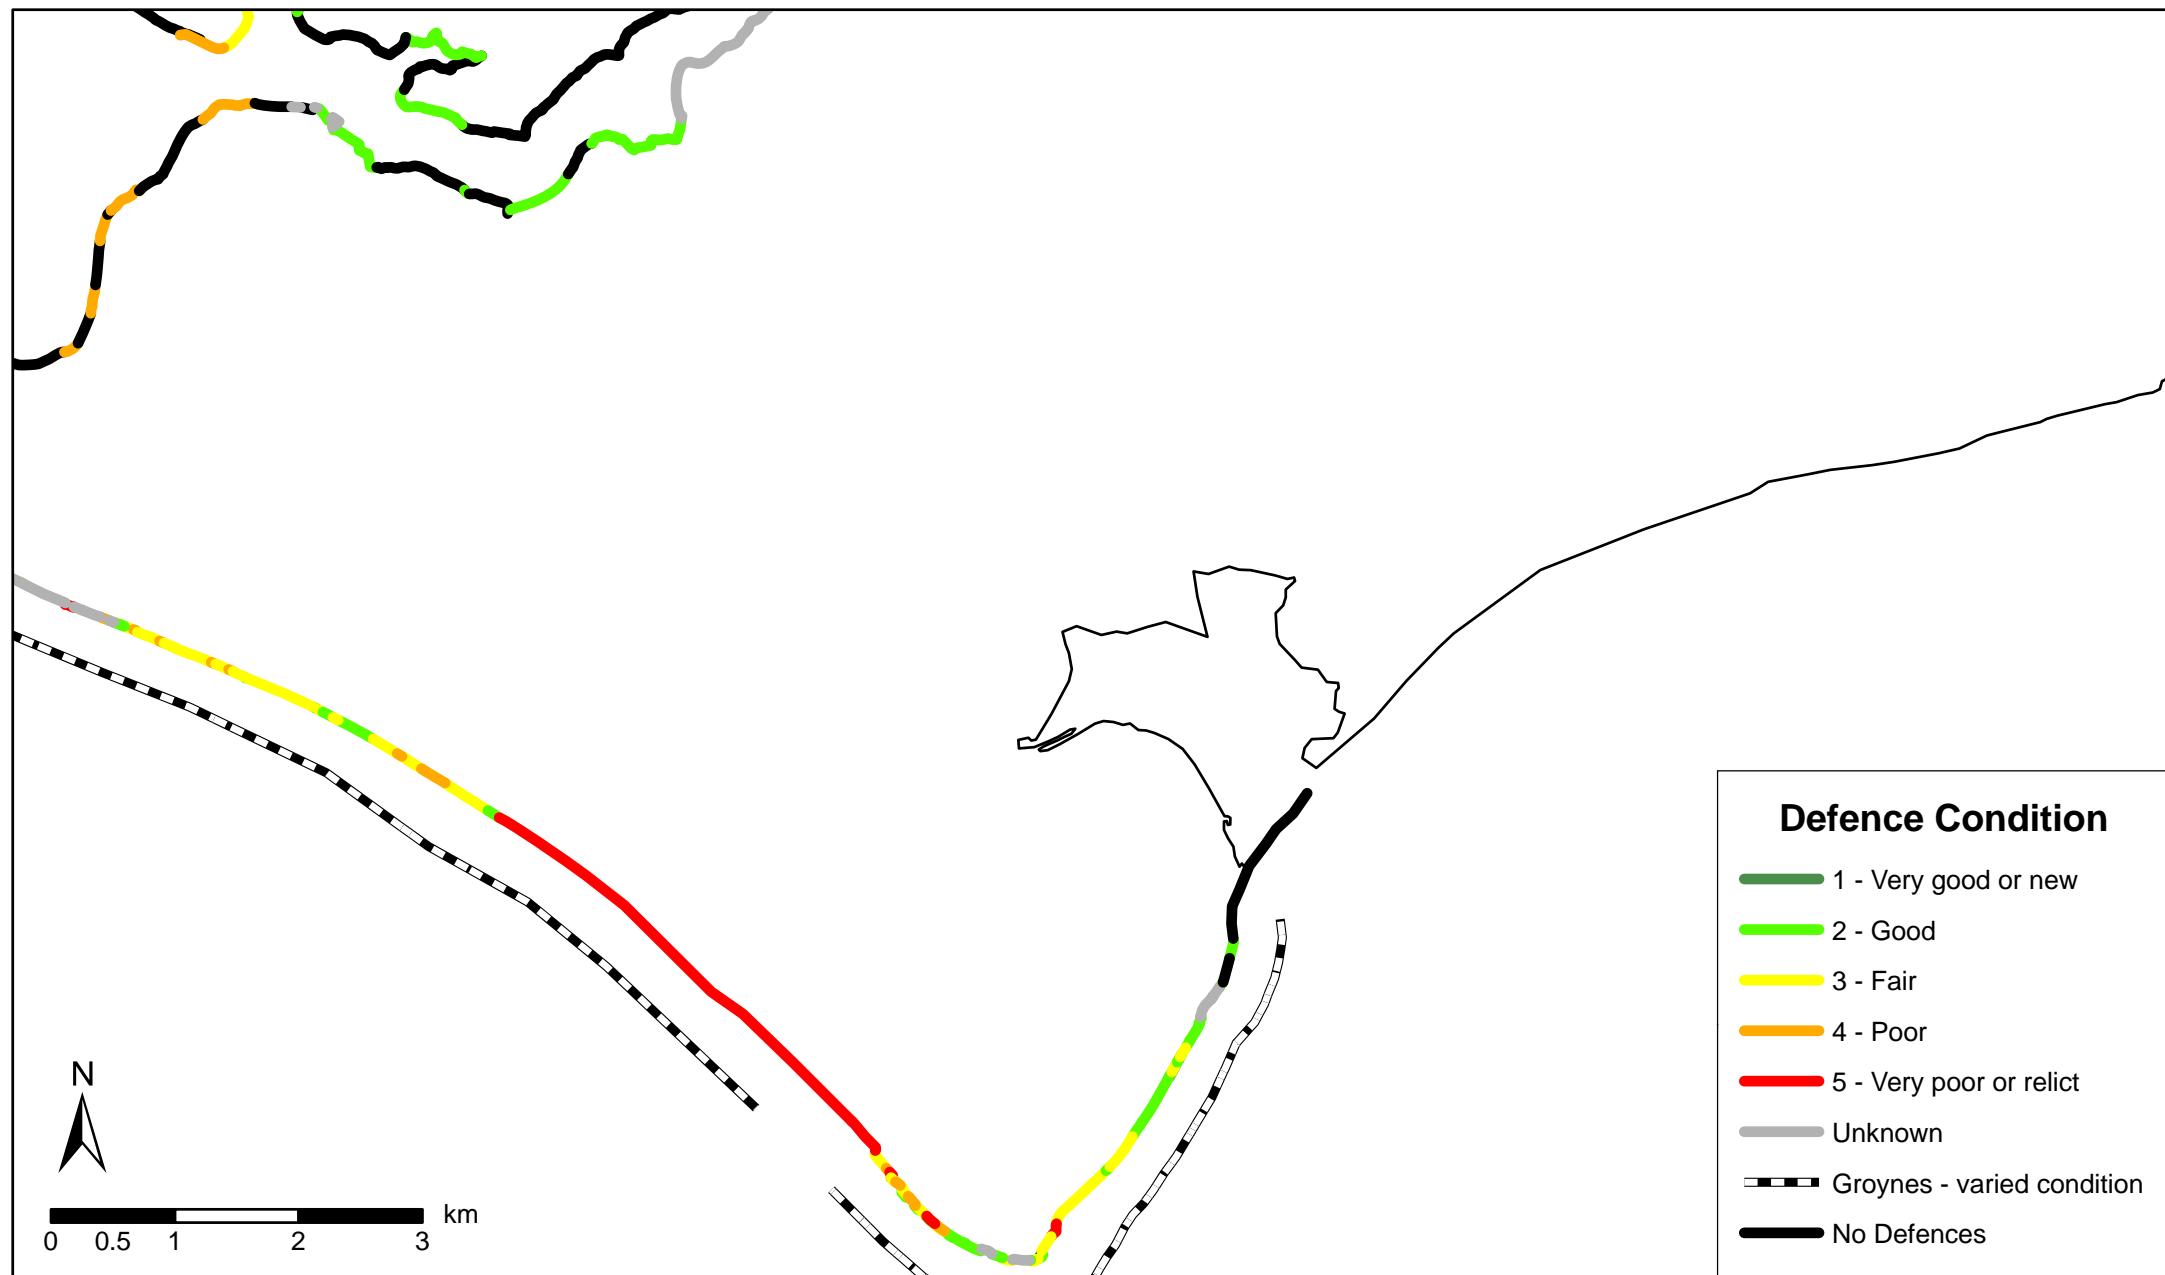

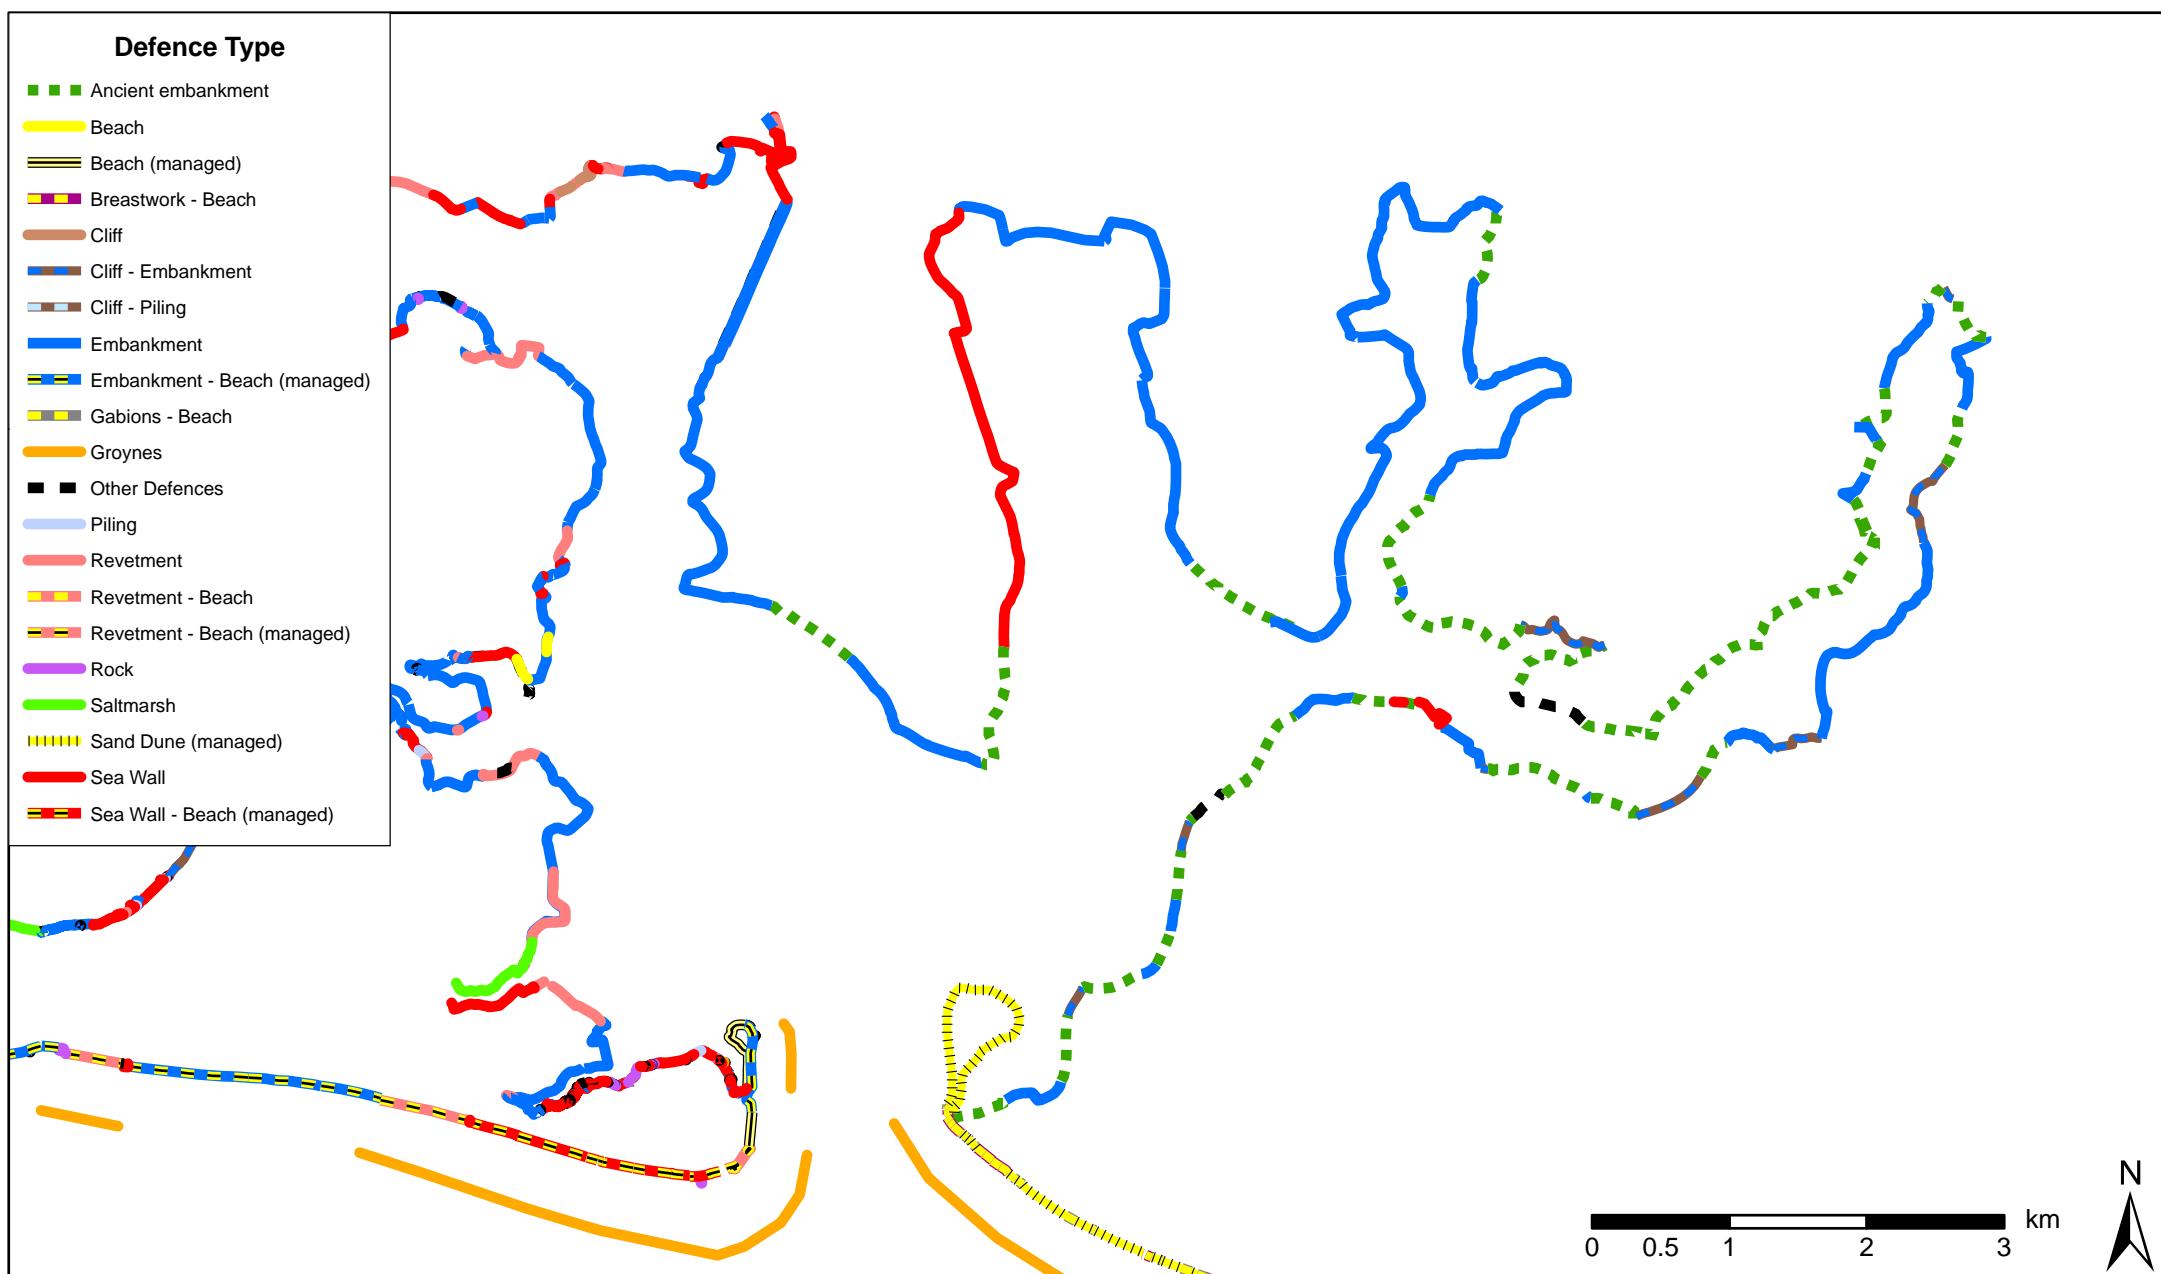

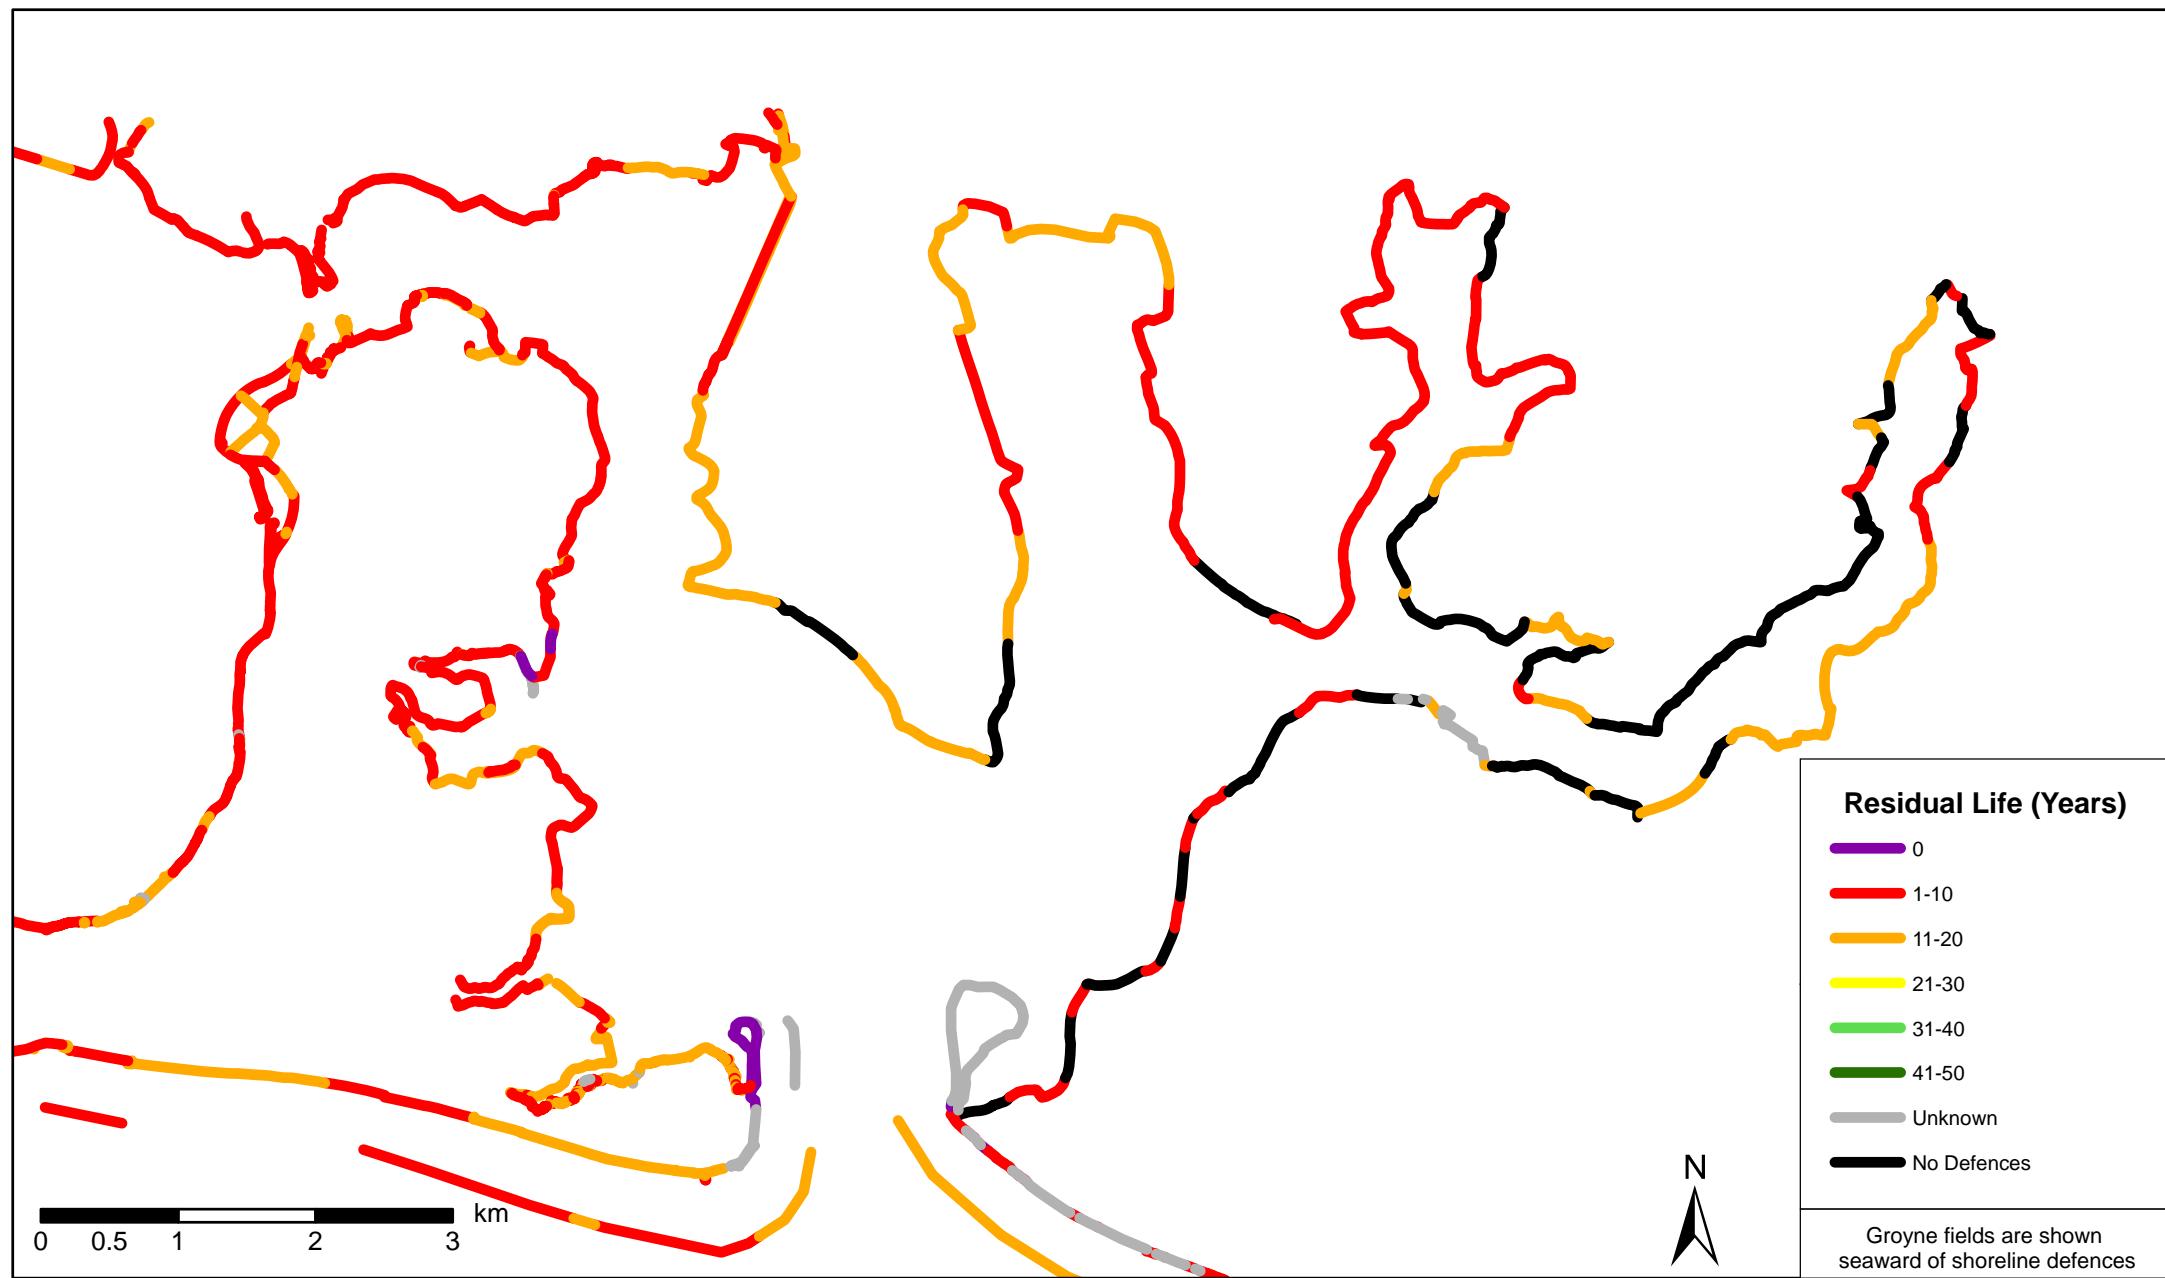

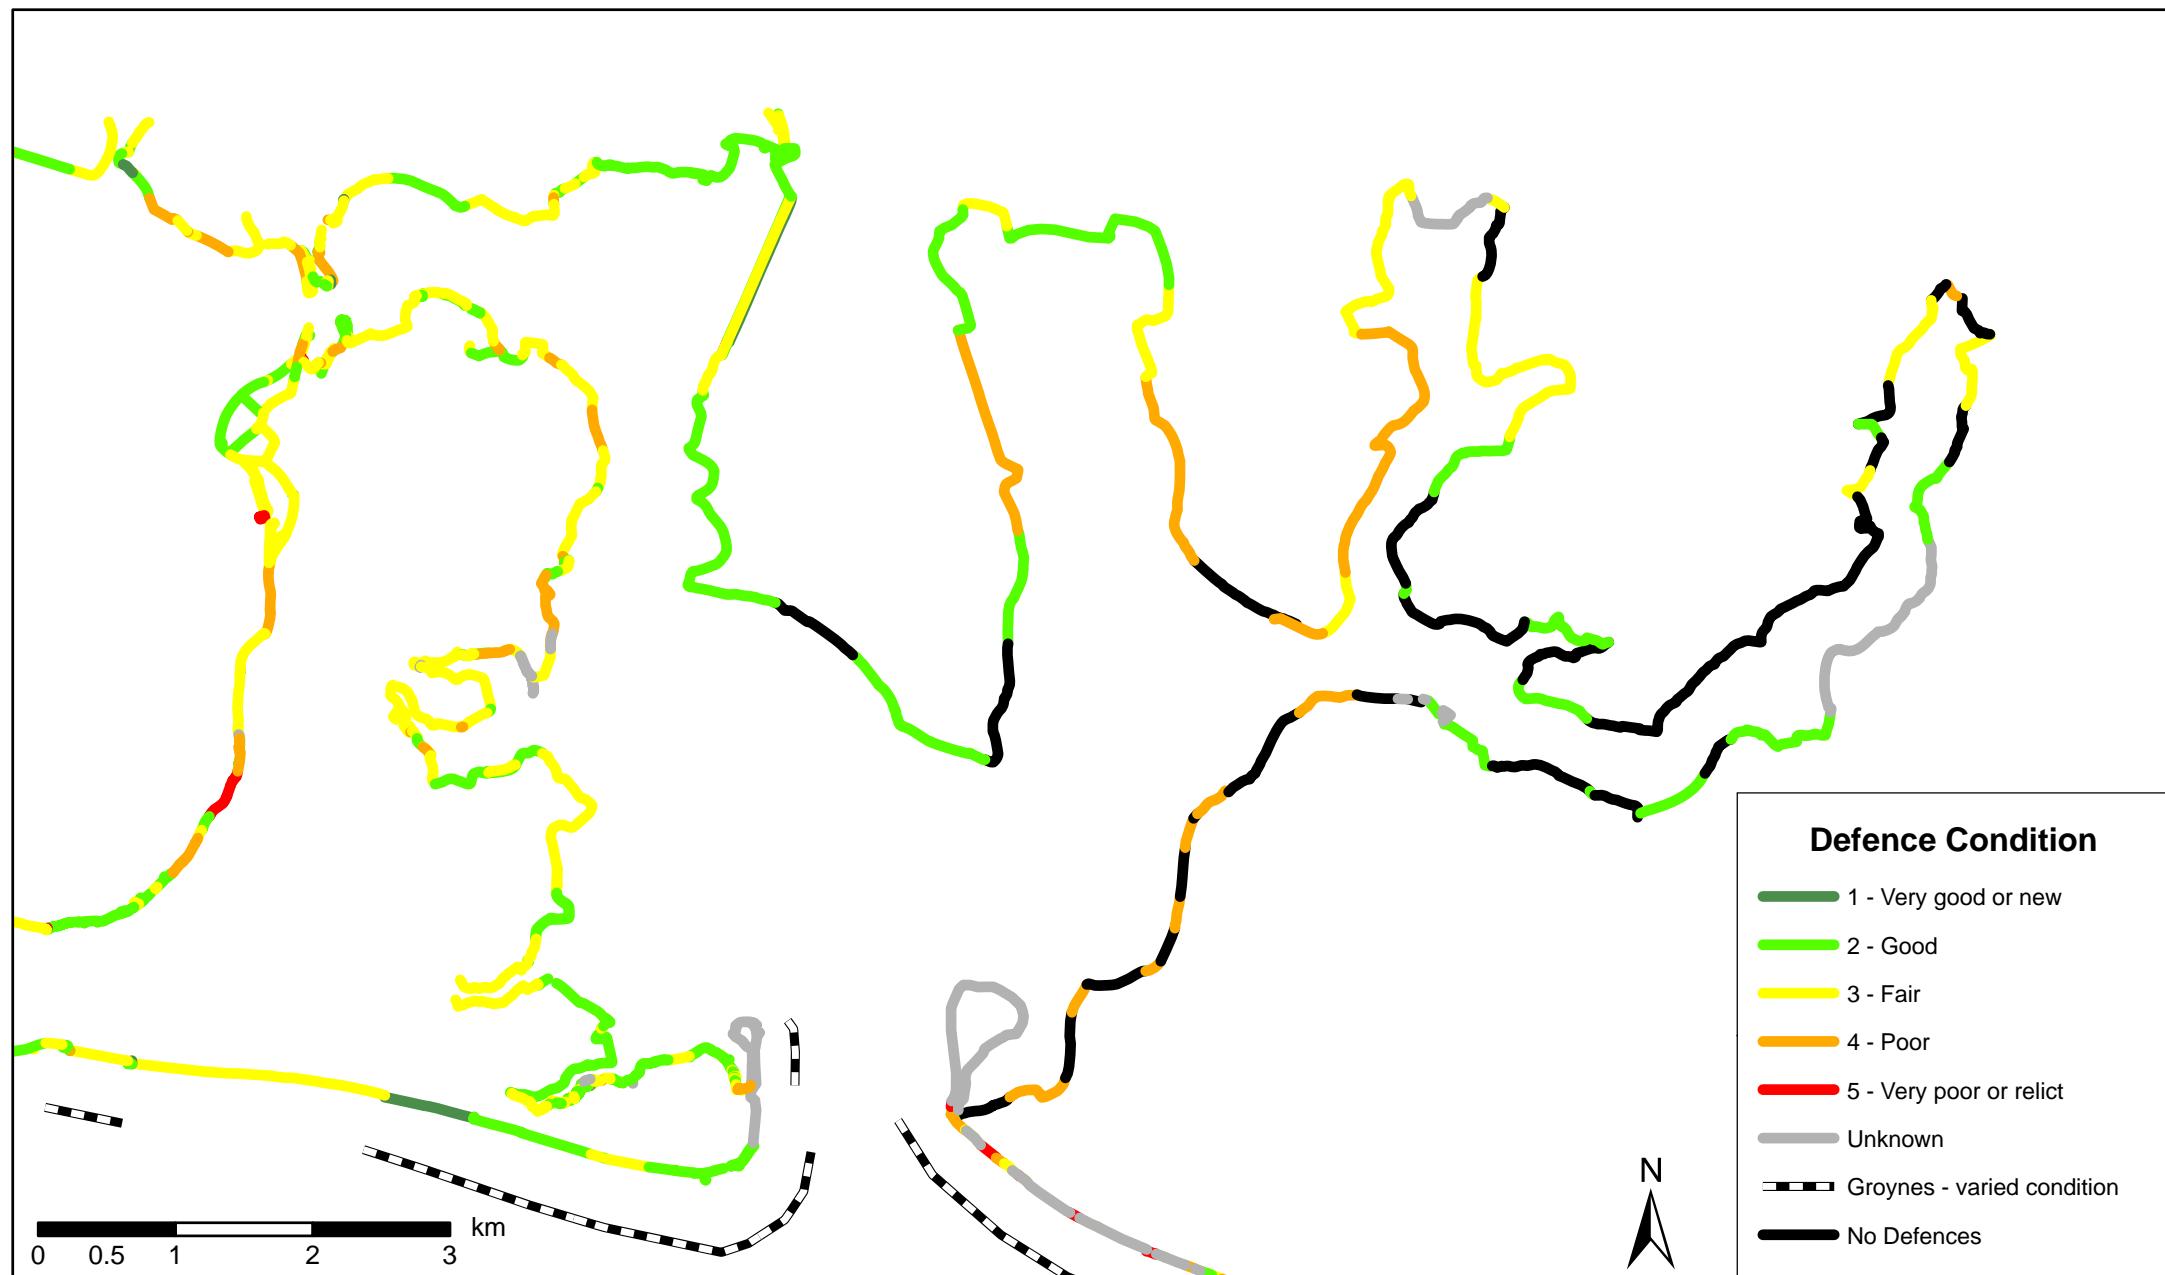

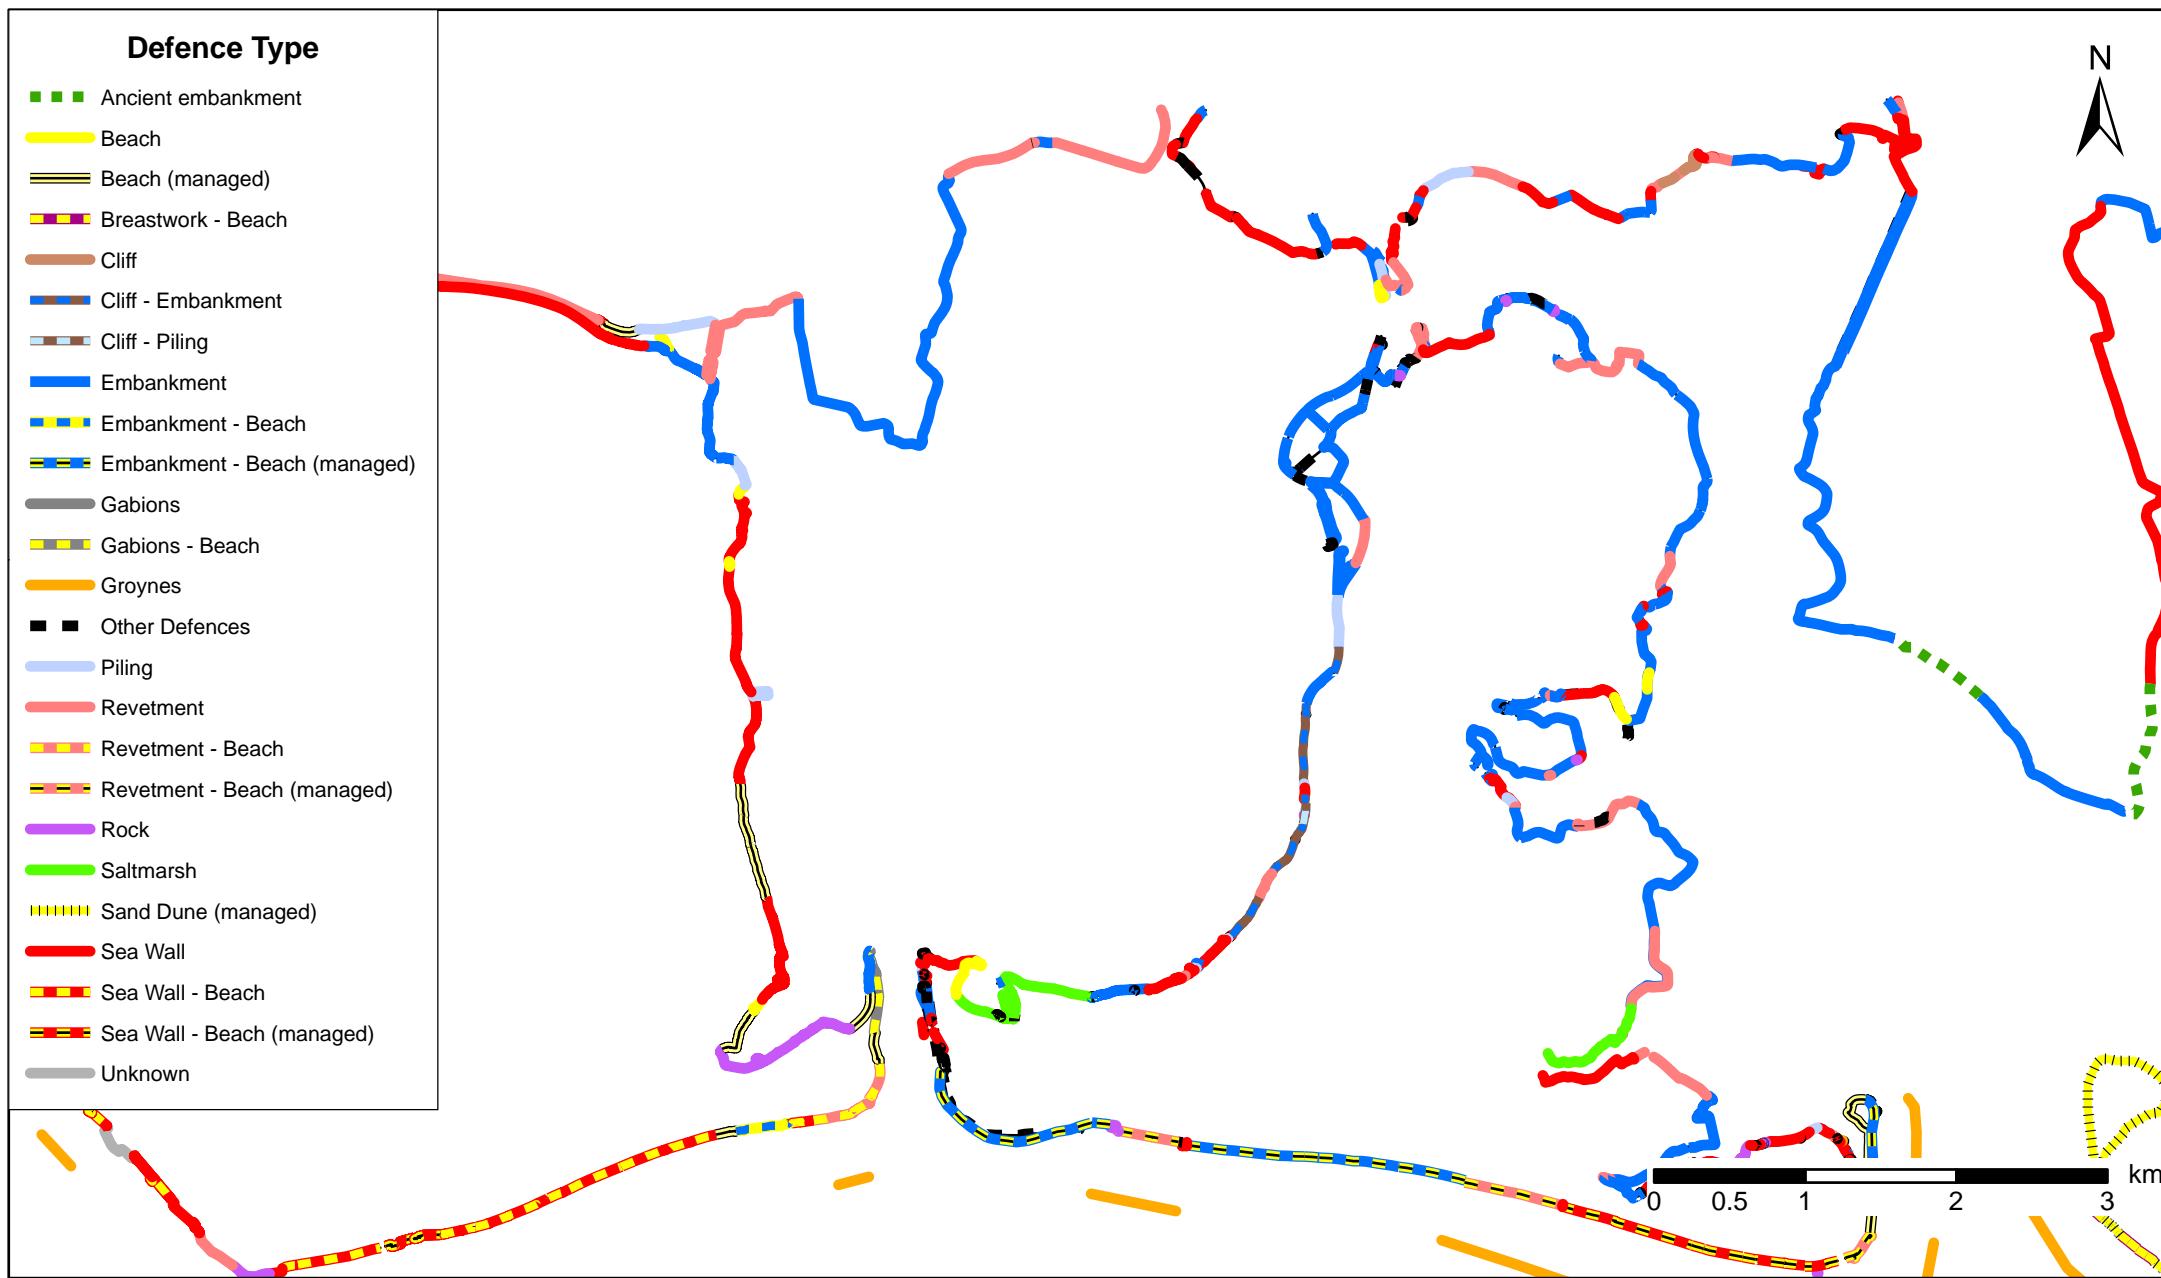

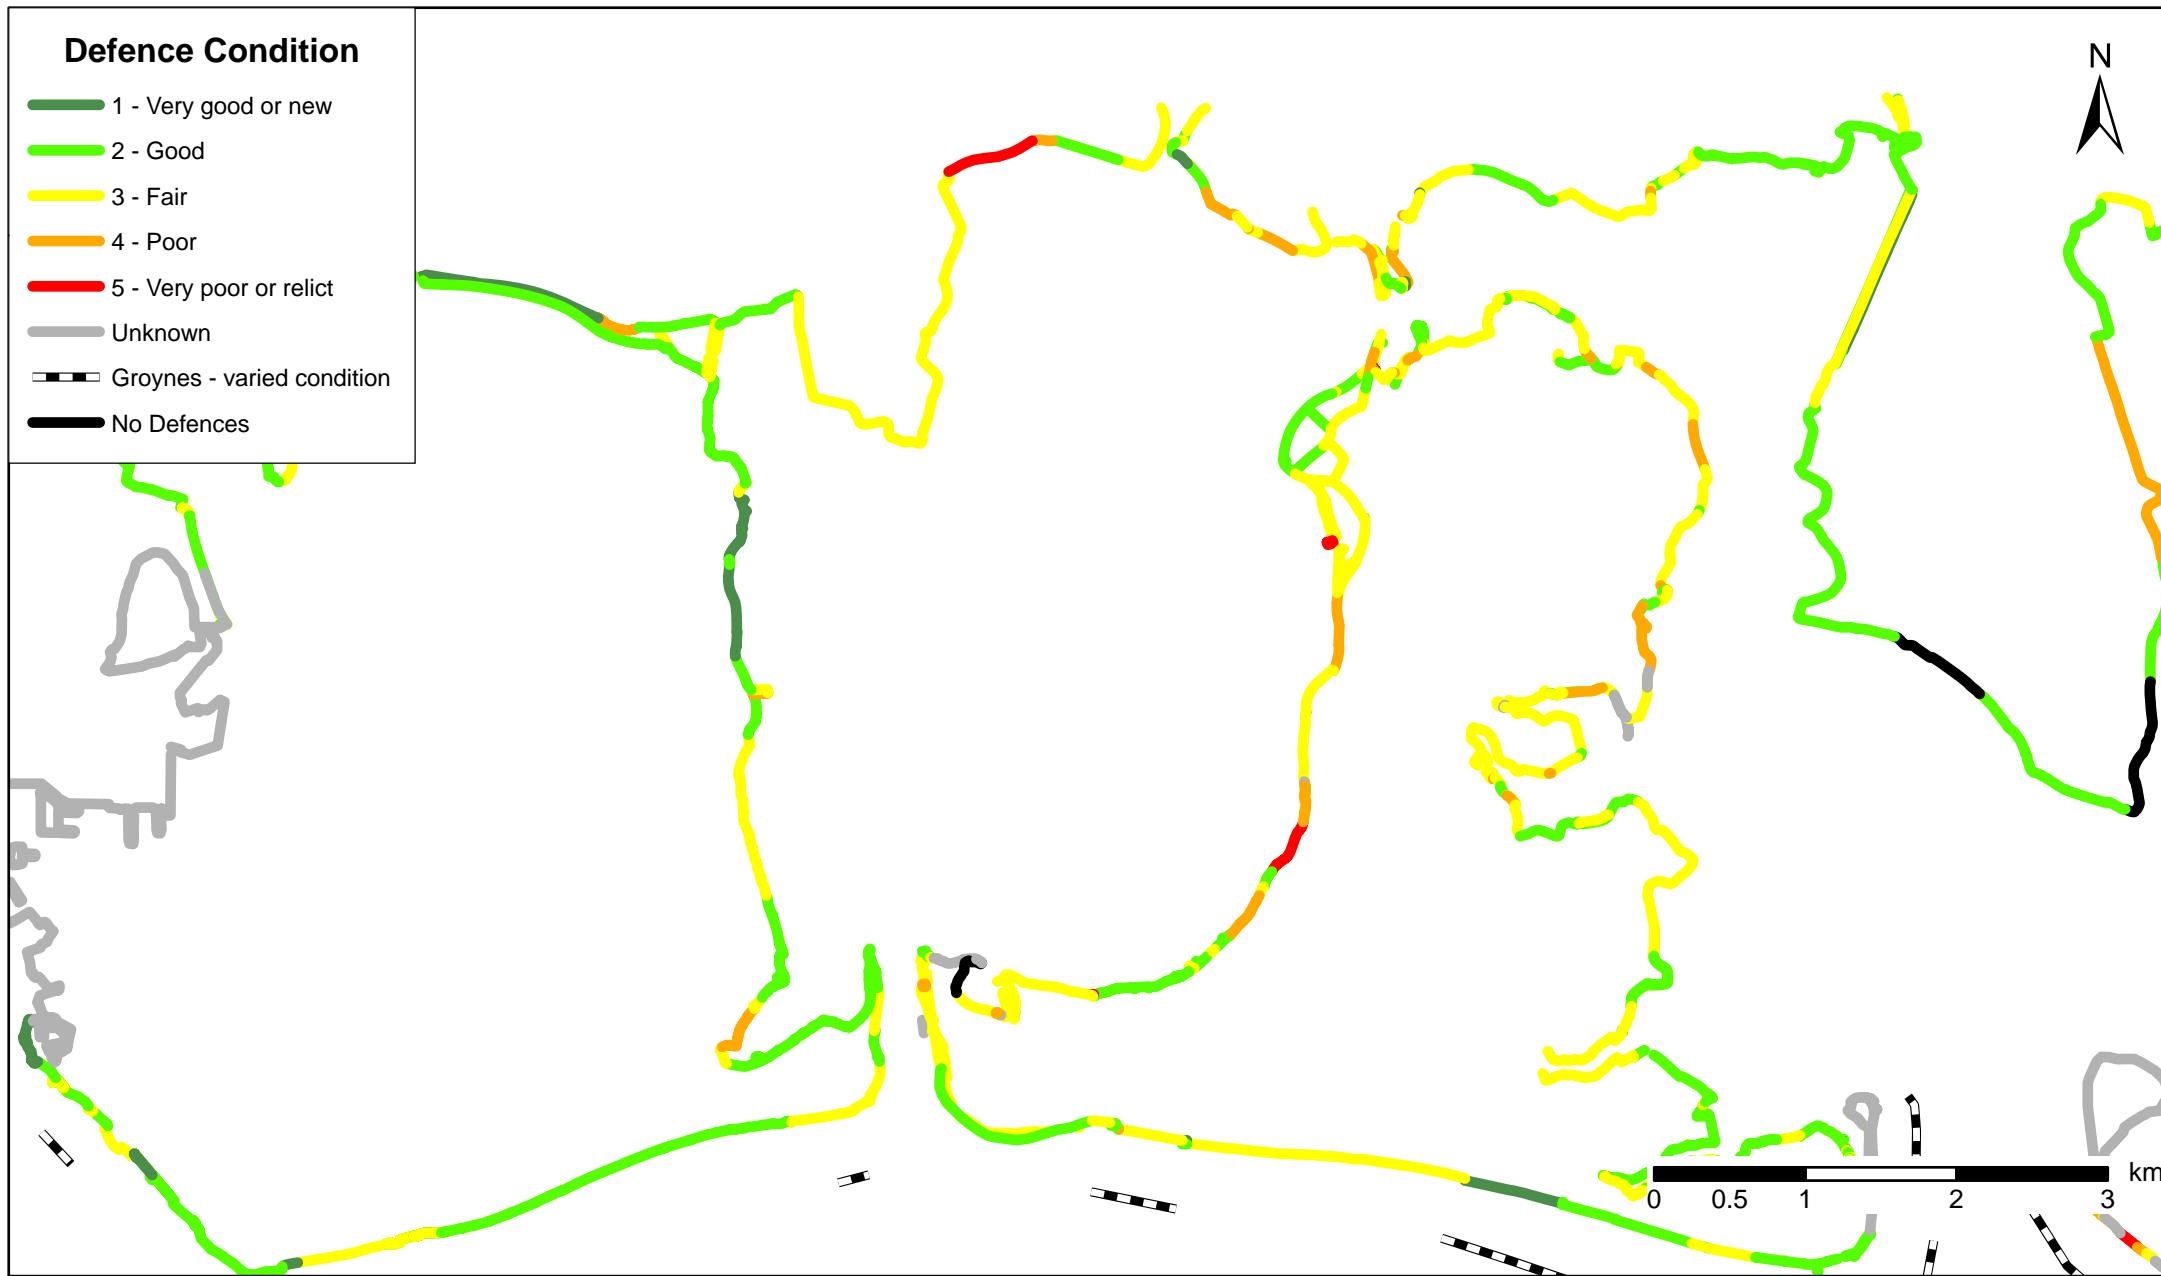

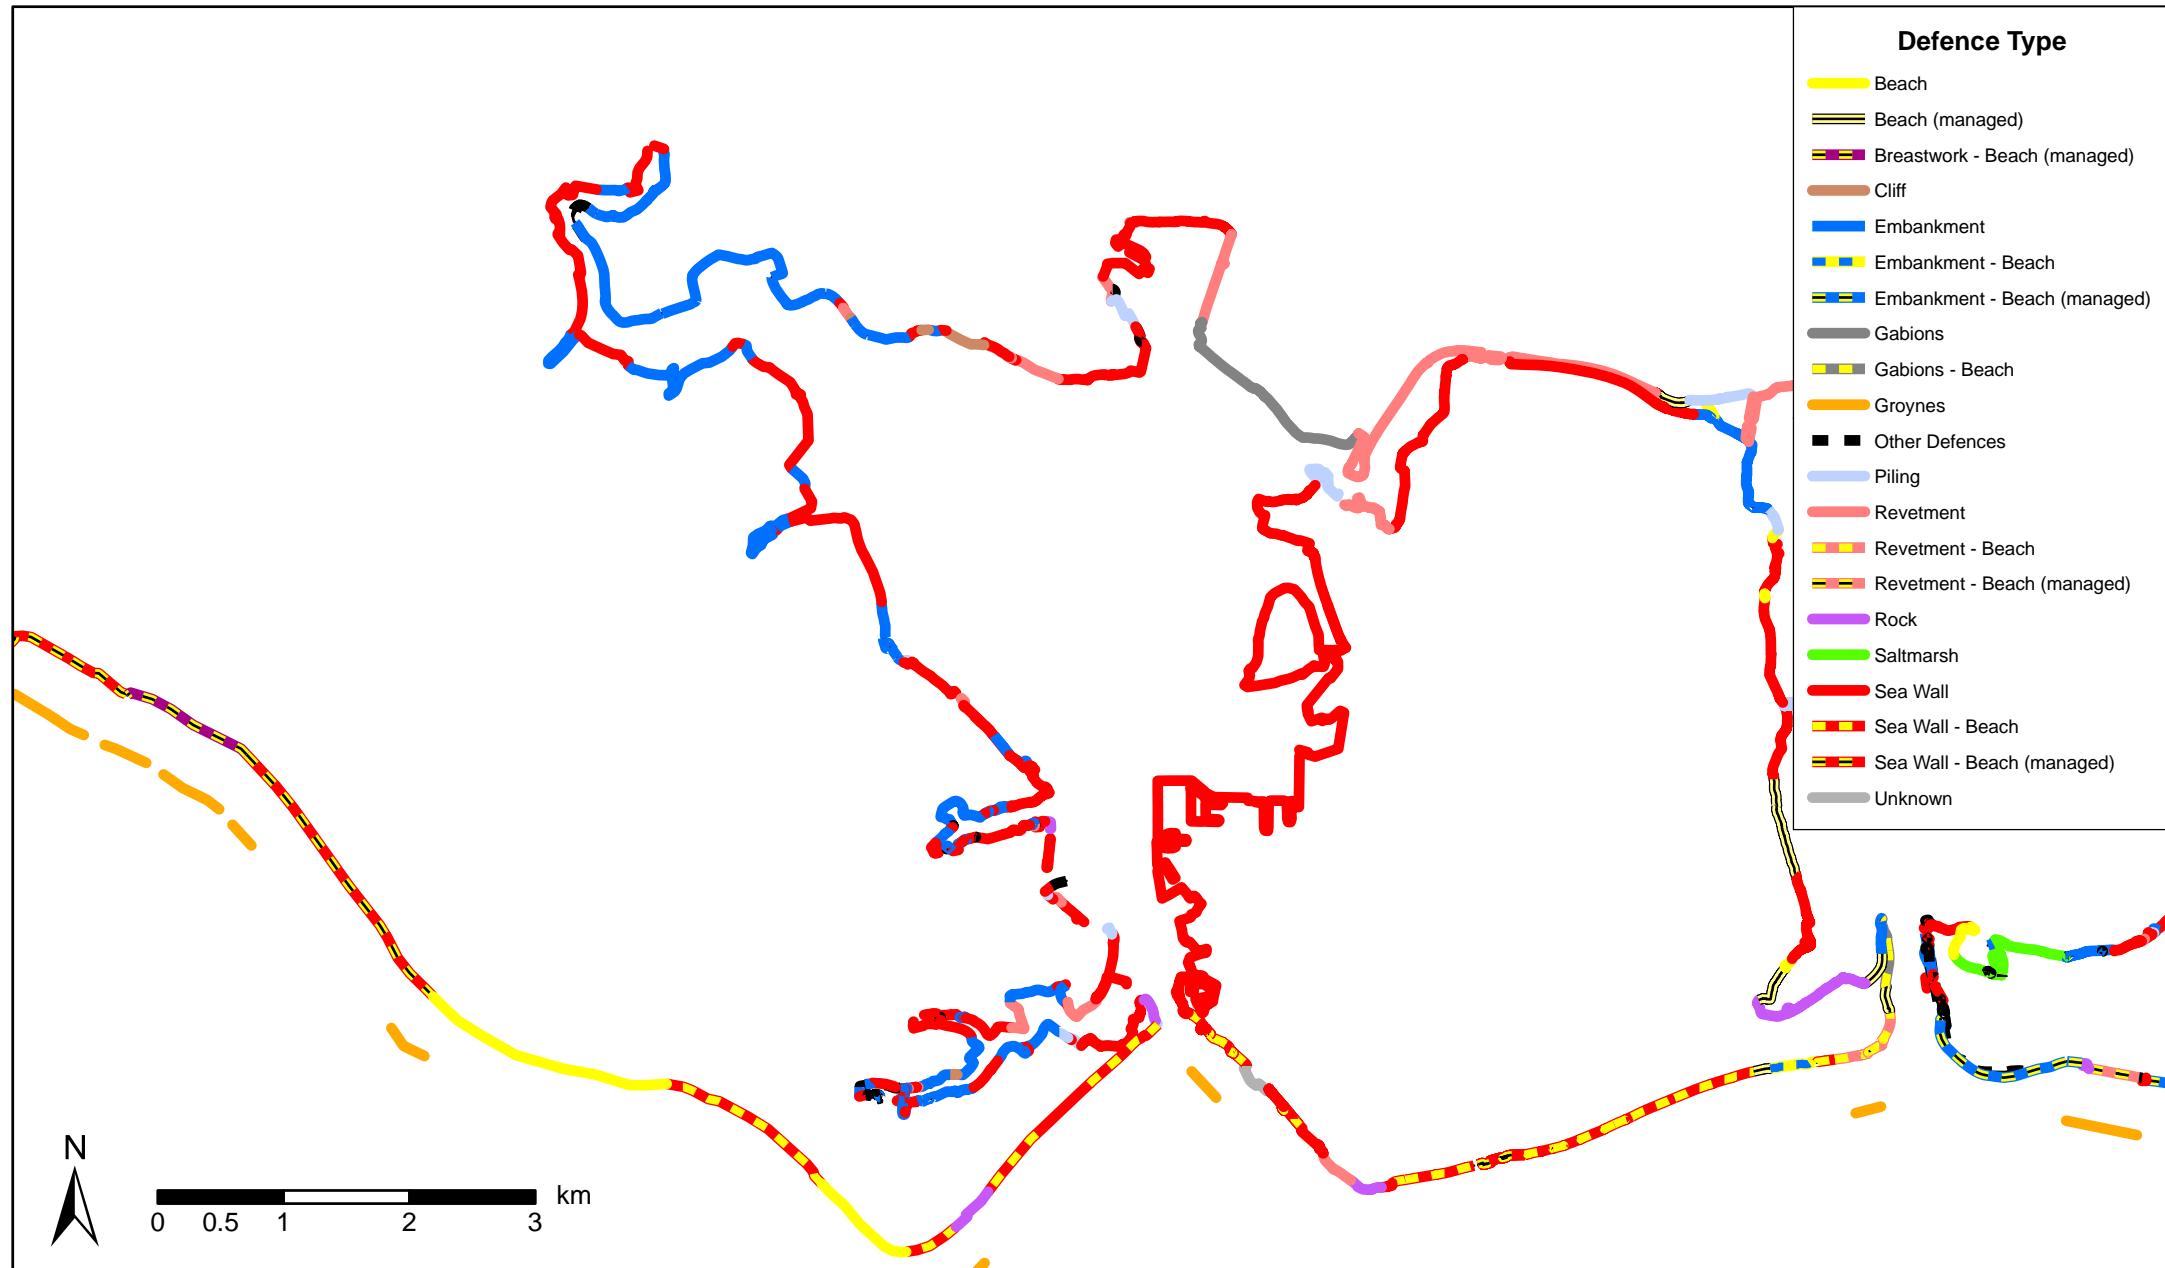

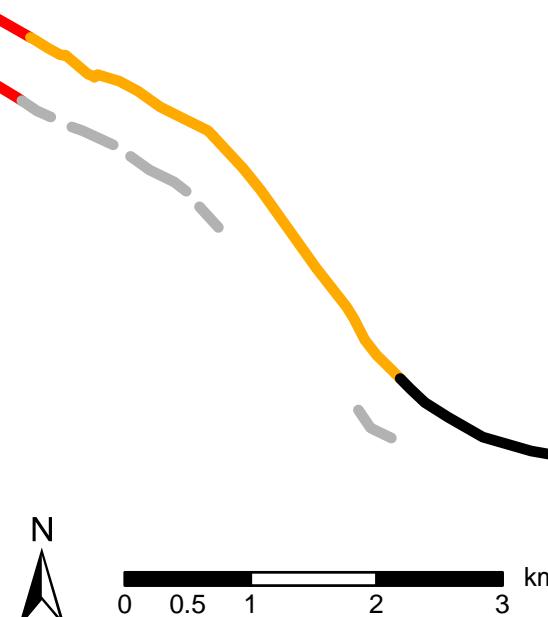

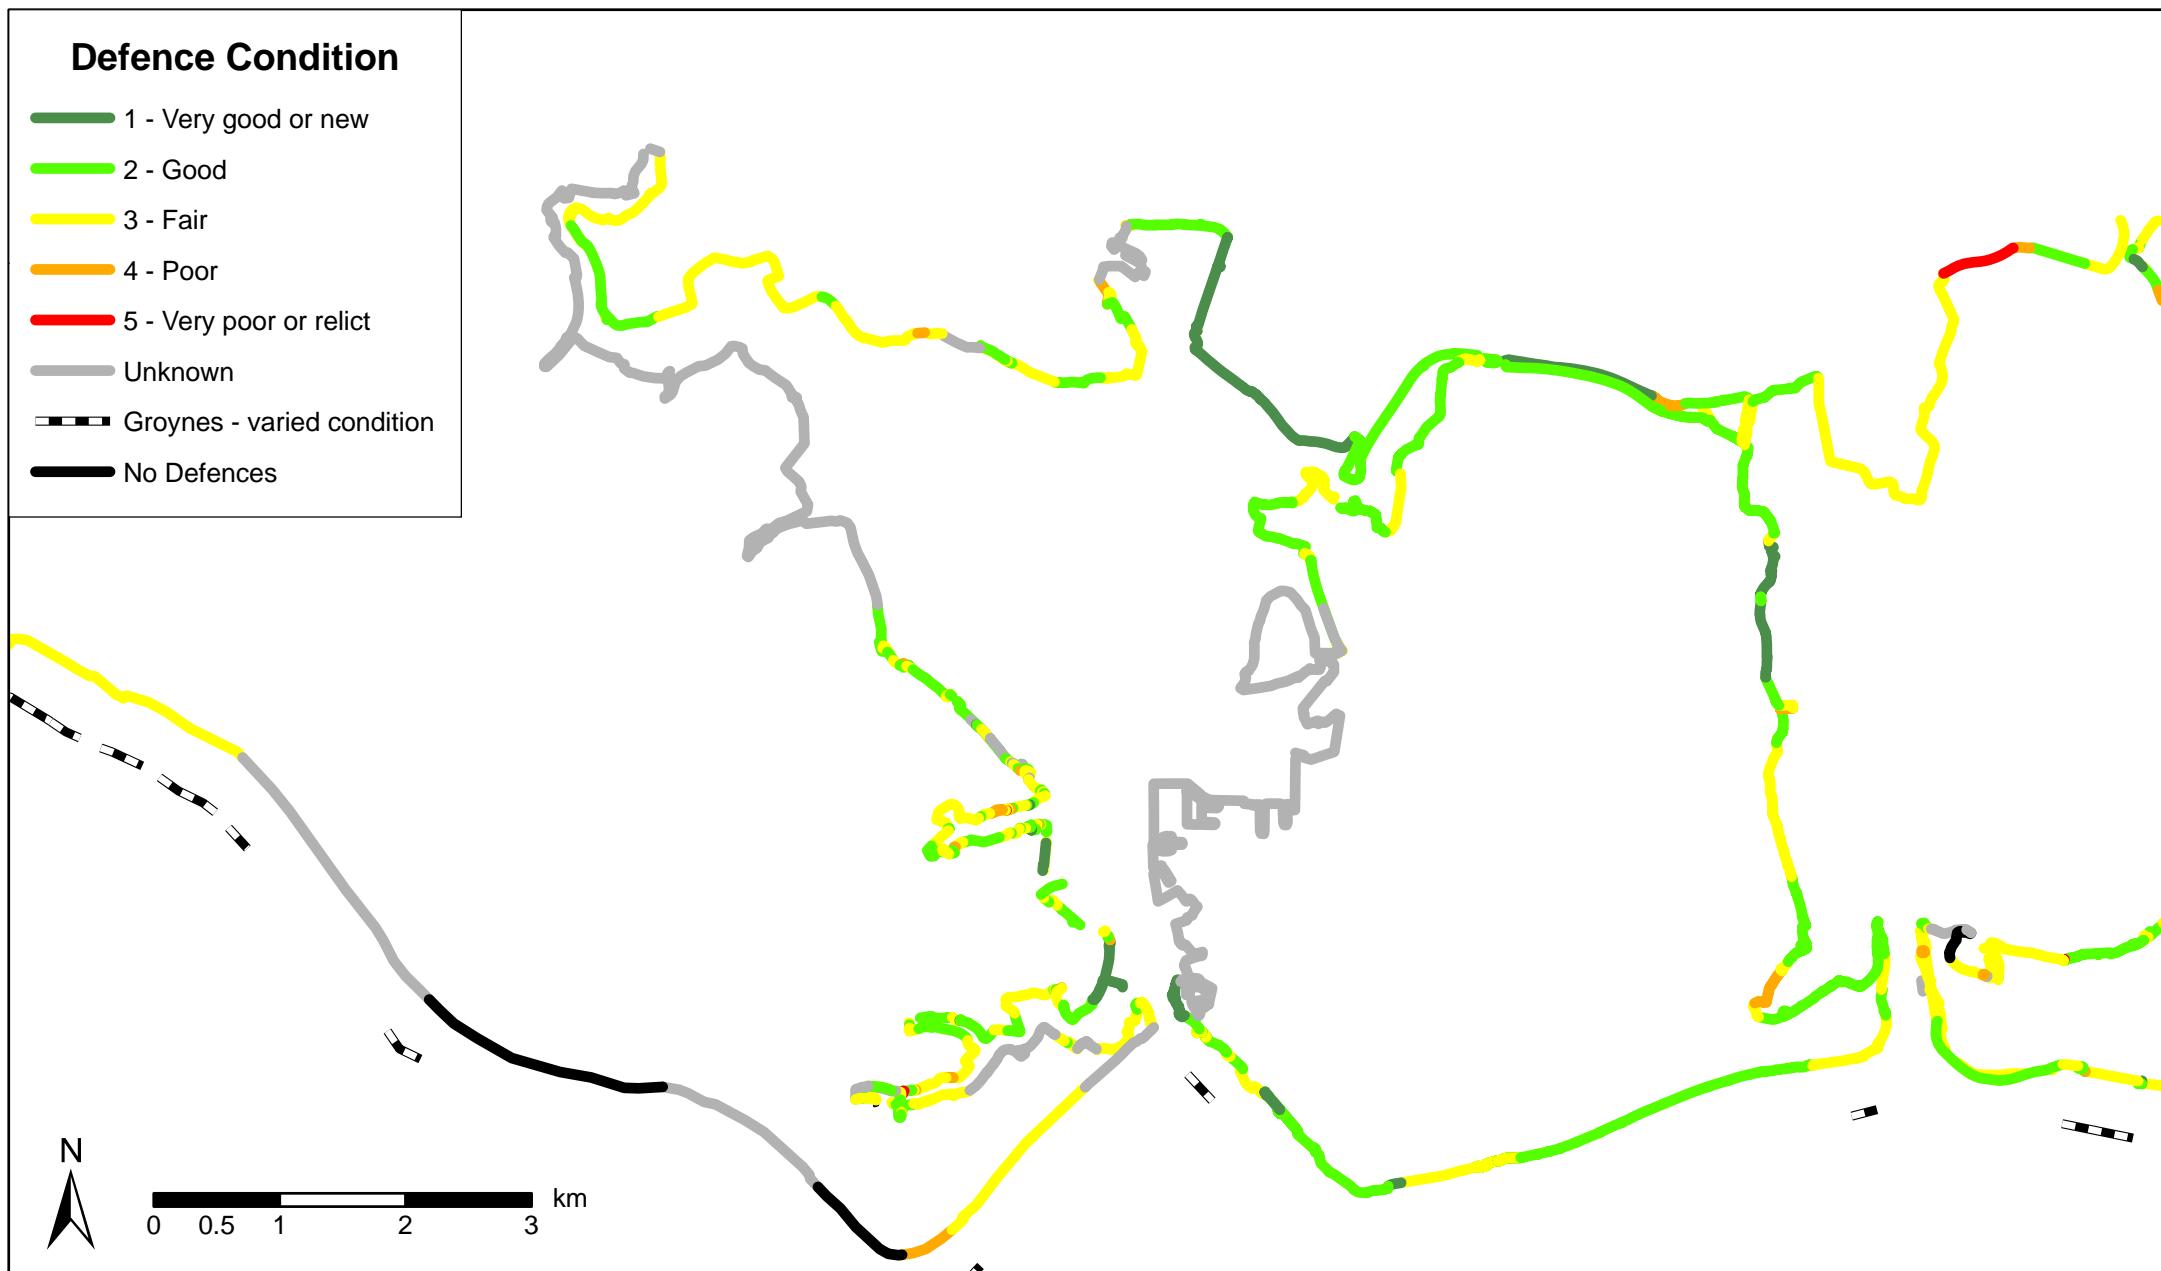

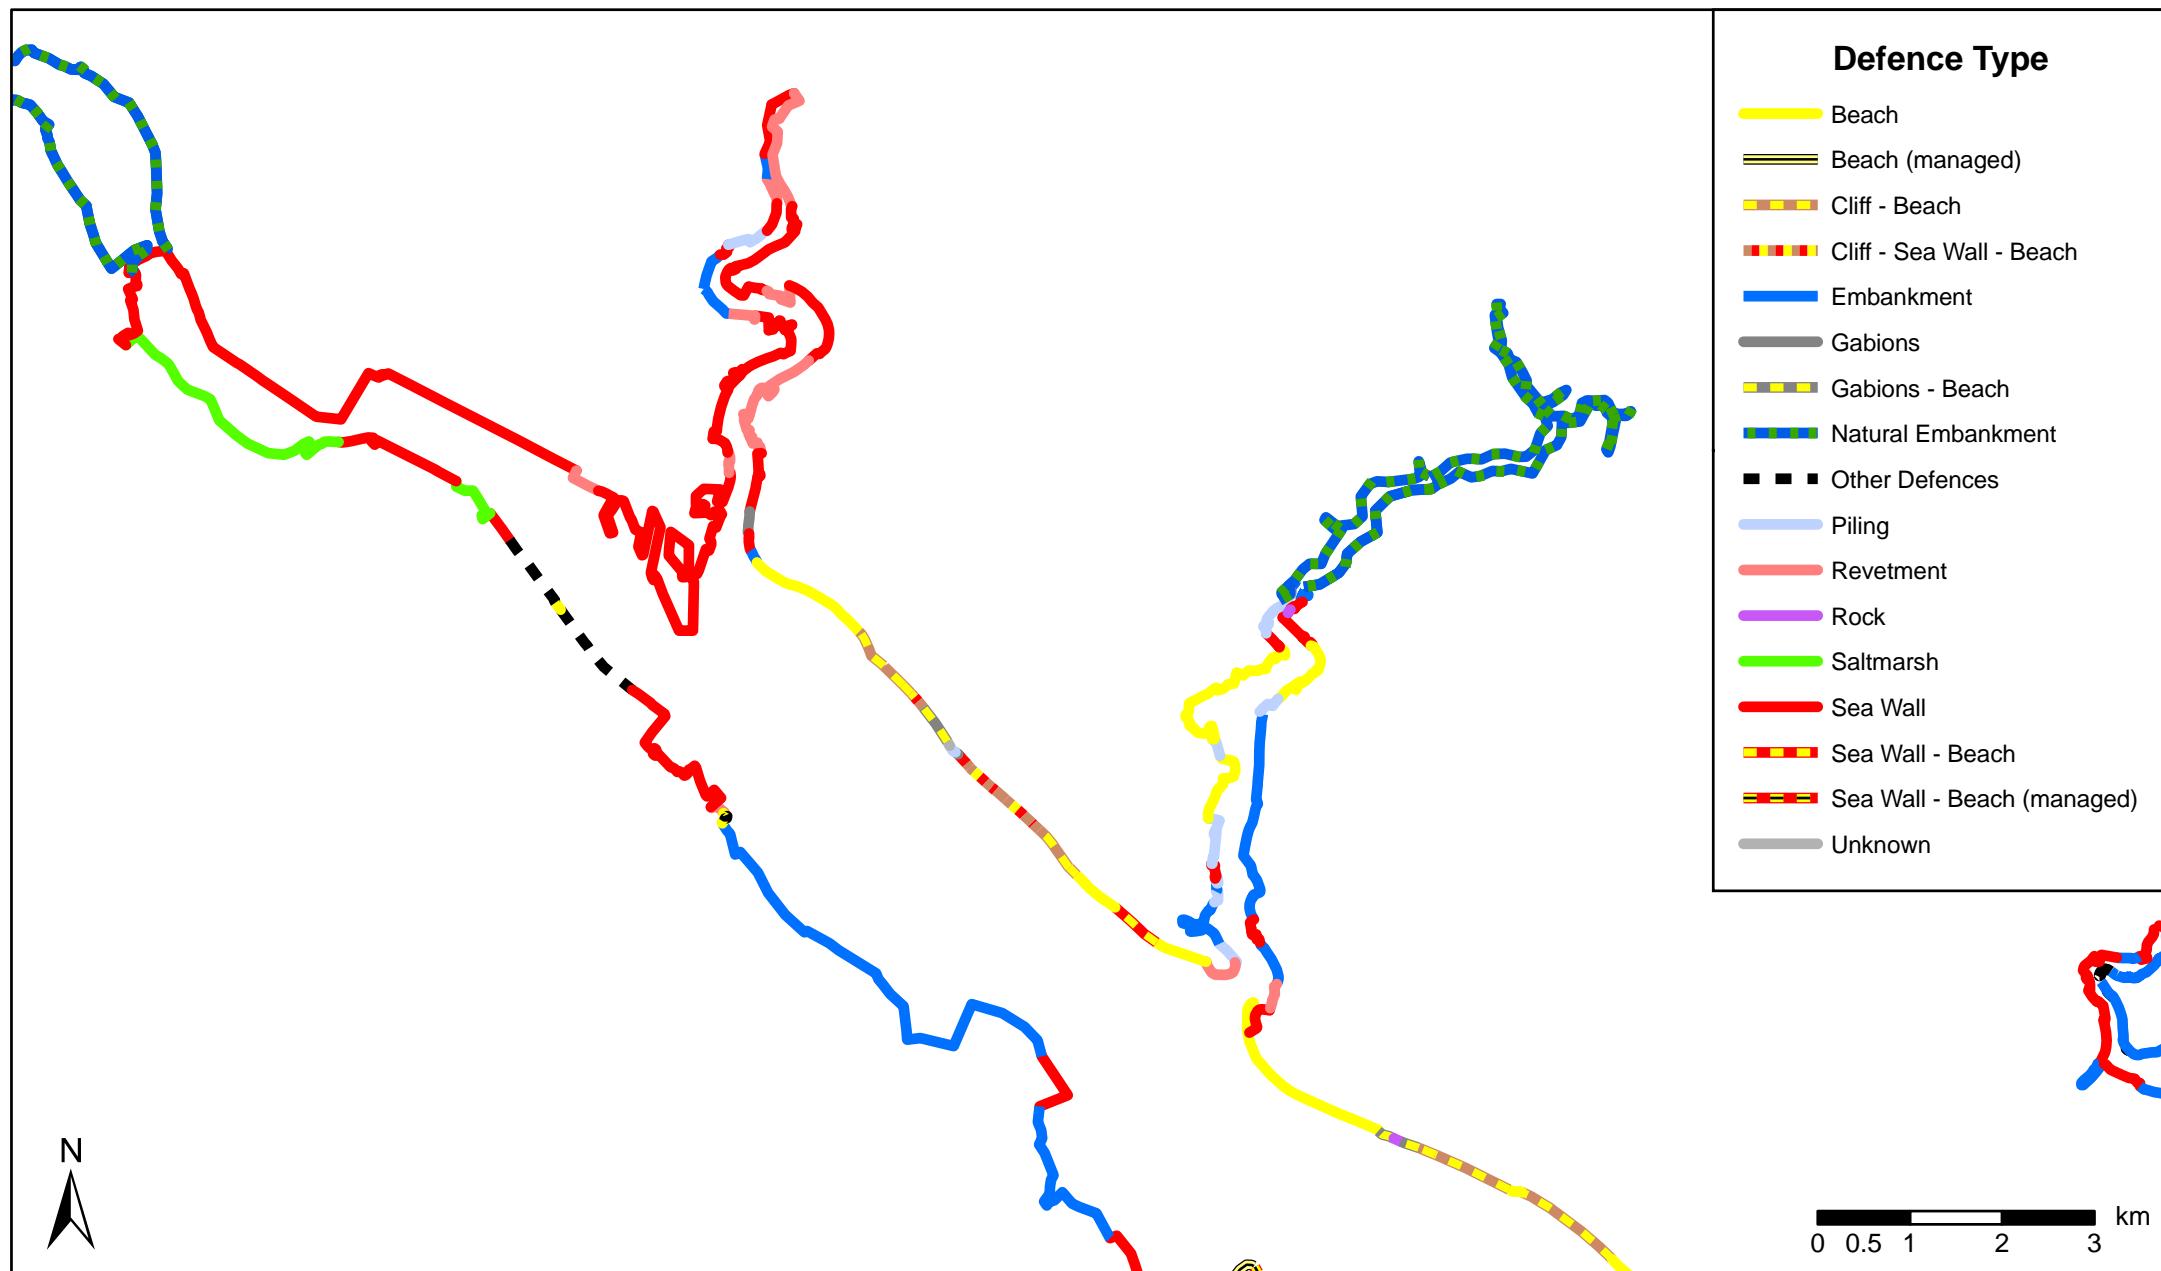

Residual Life (Years)

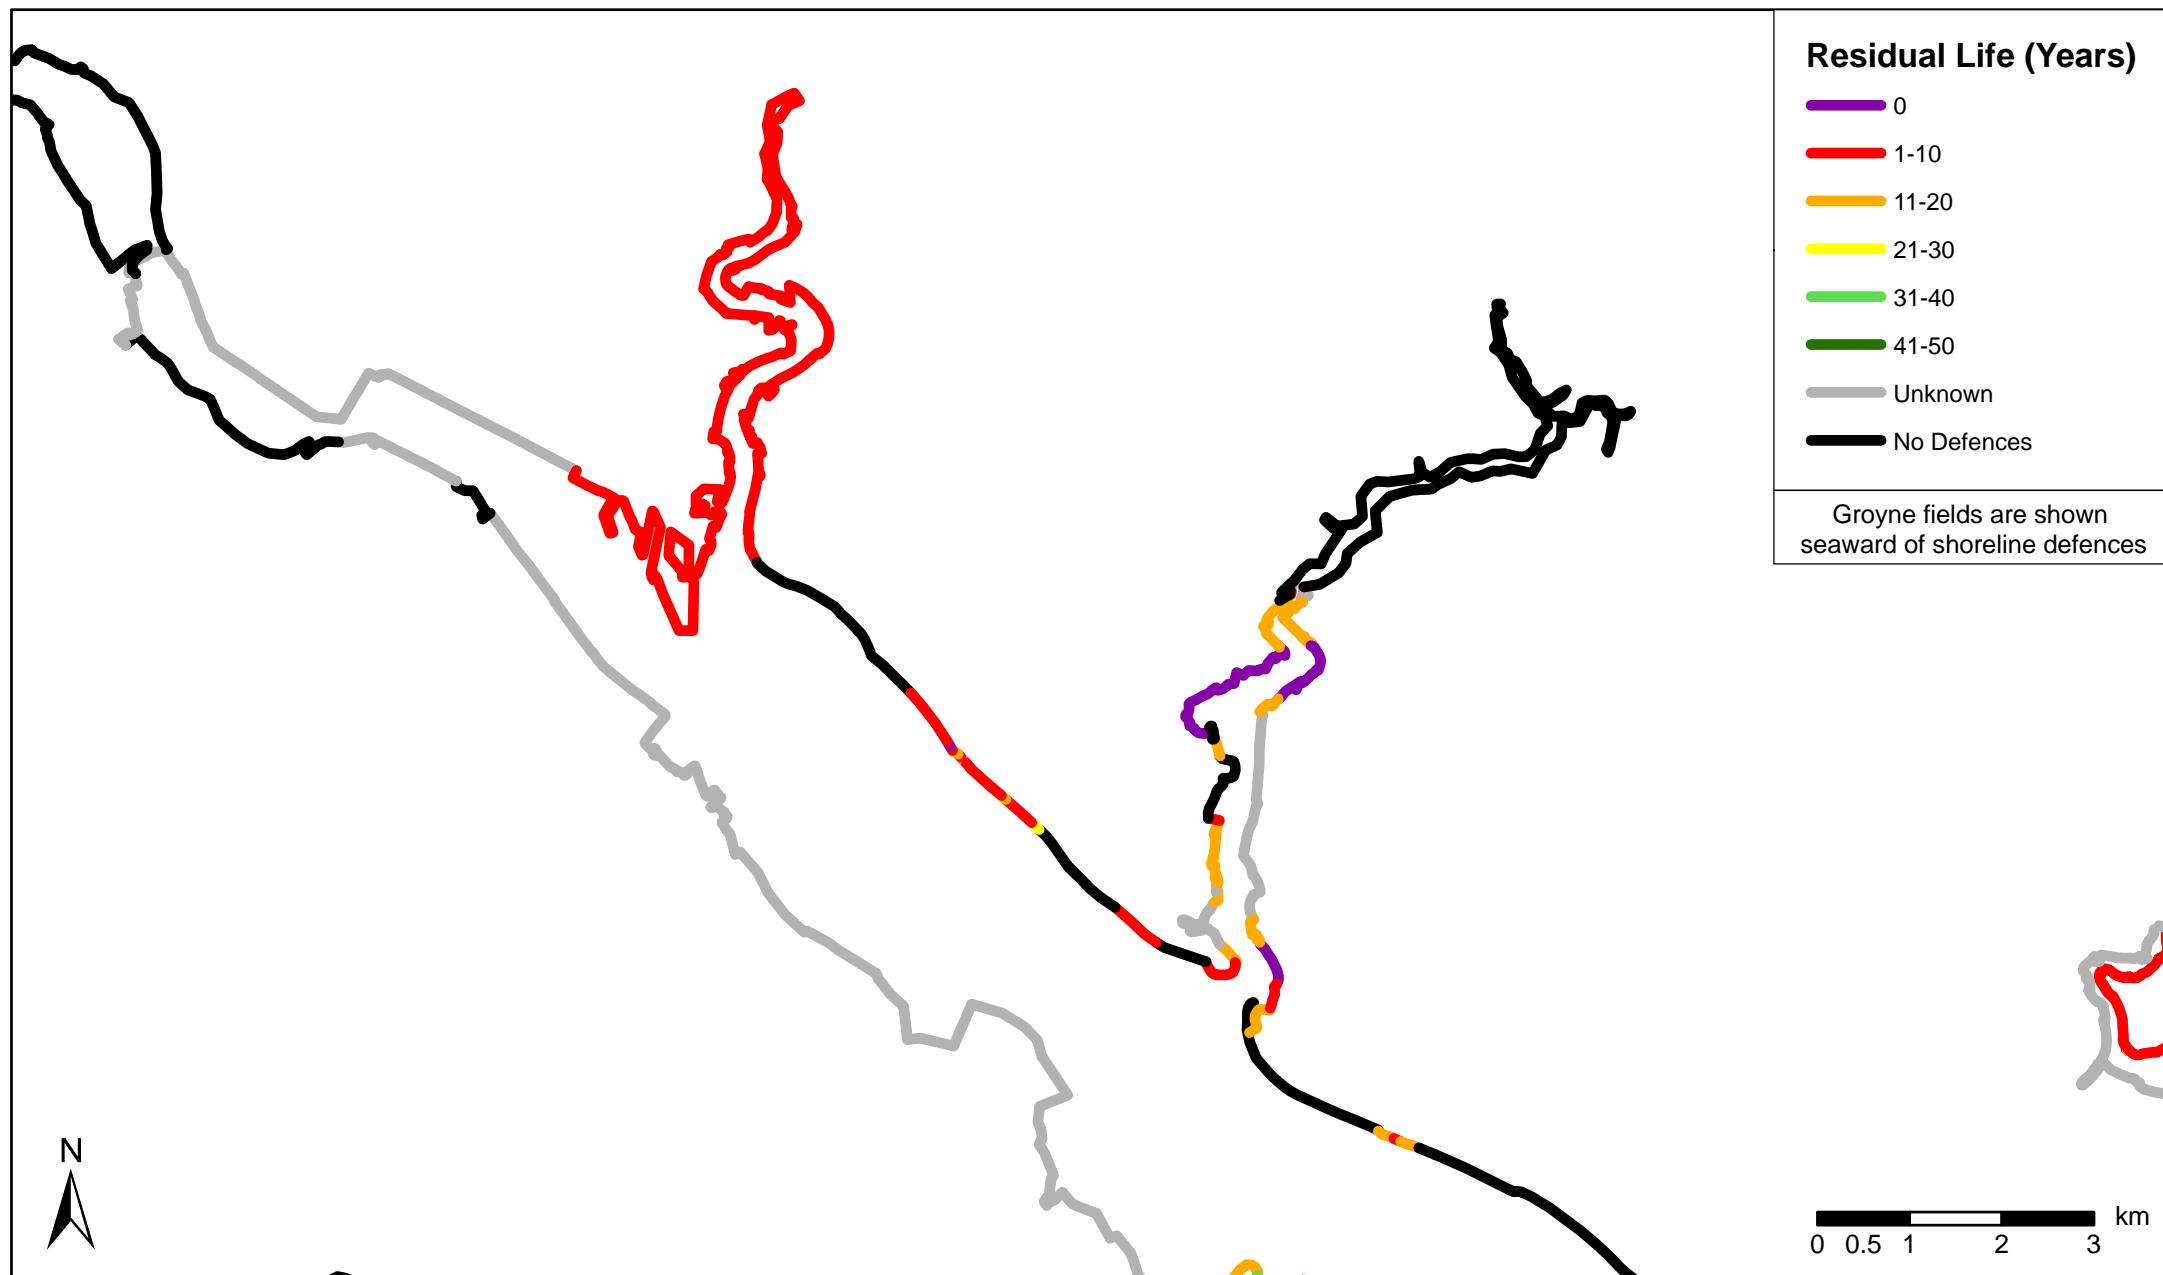

- 0
- 1-10
- 11-20
- 21-30
- 31-40
- 41-50
- Unknown
- No Defences

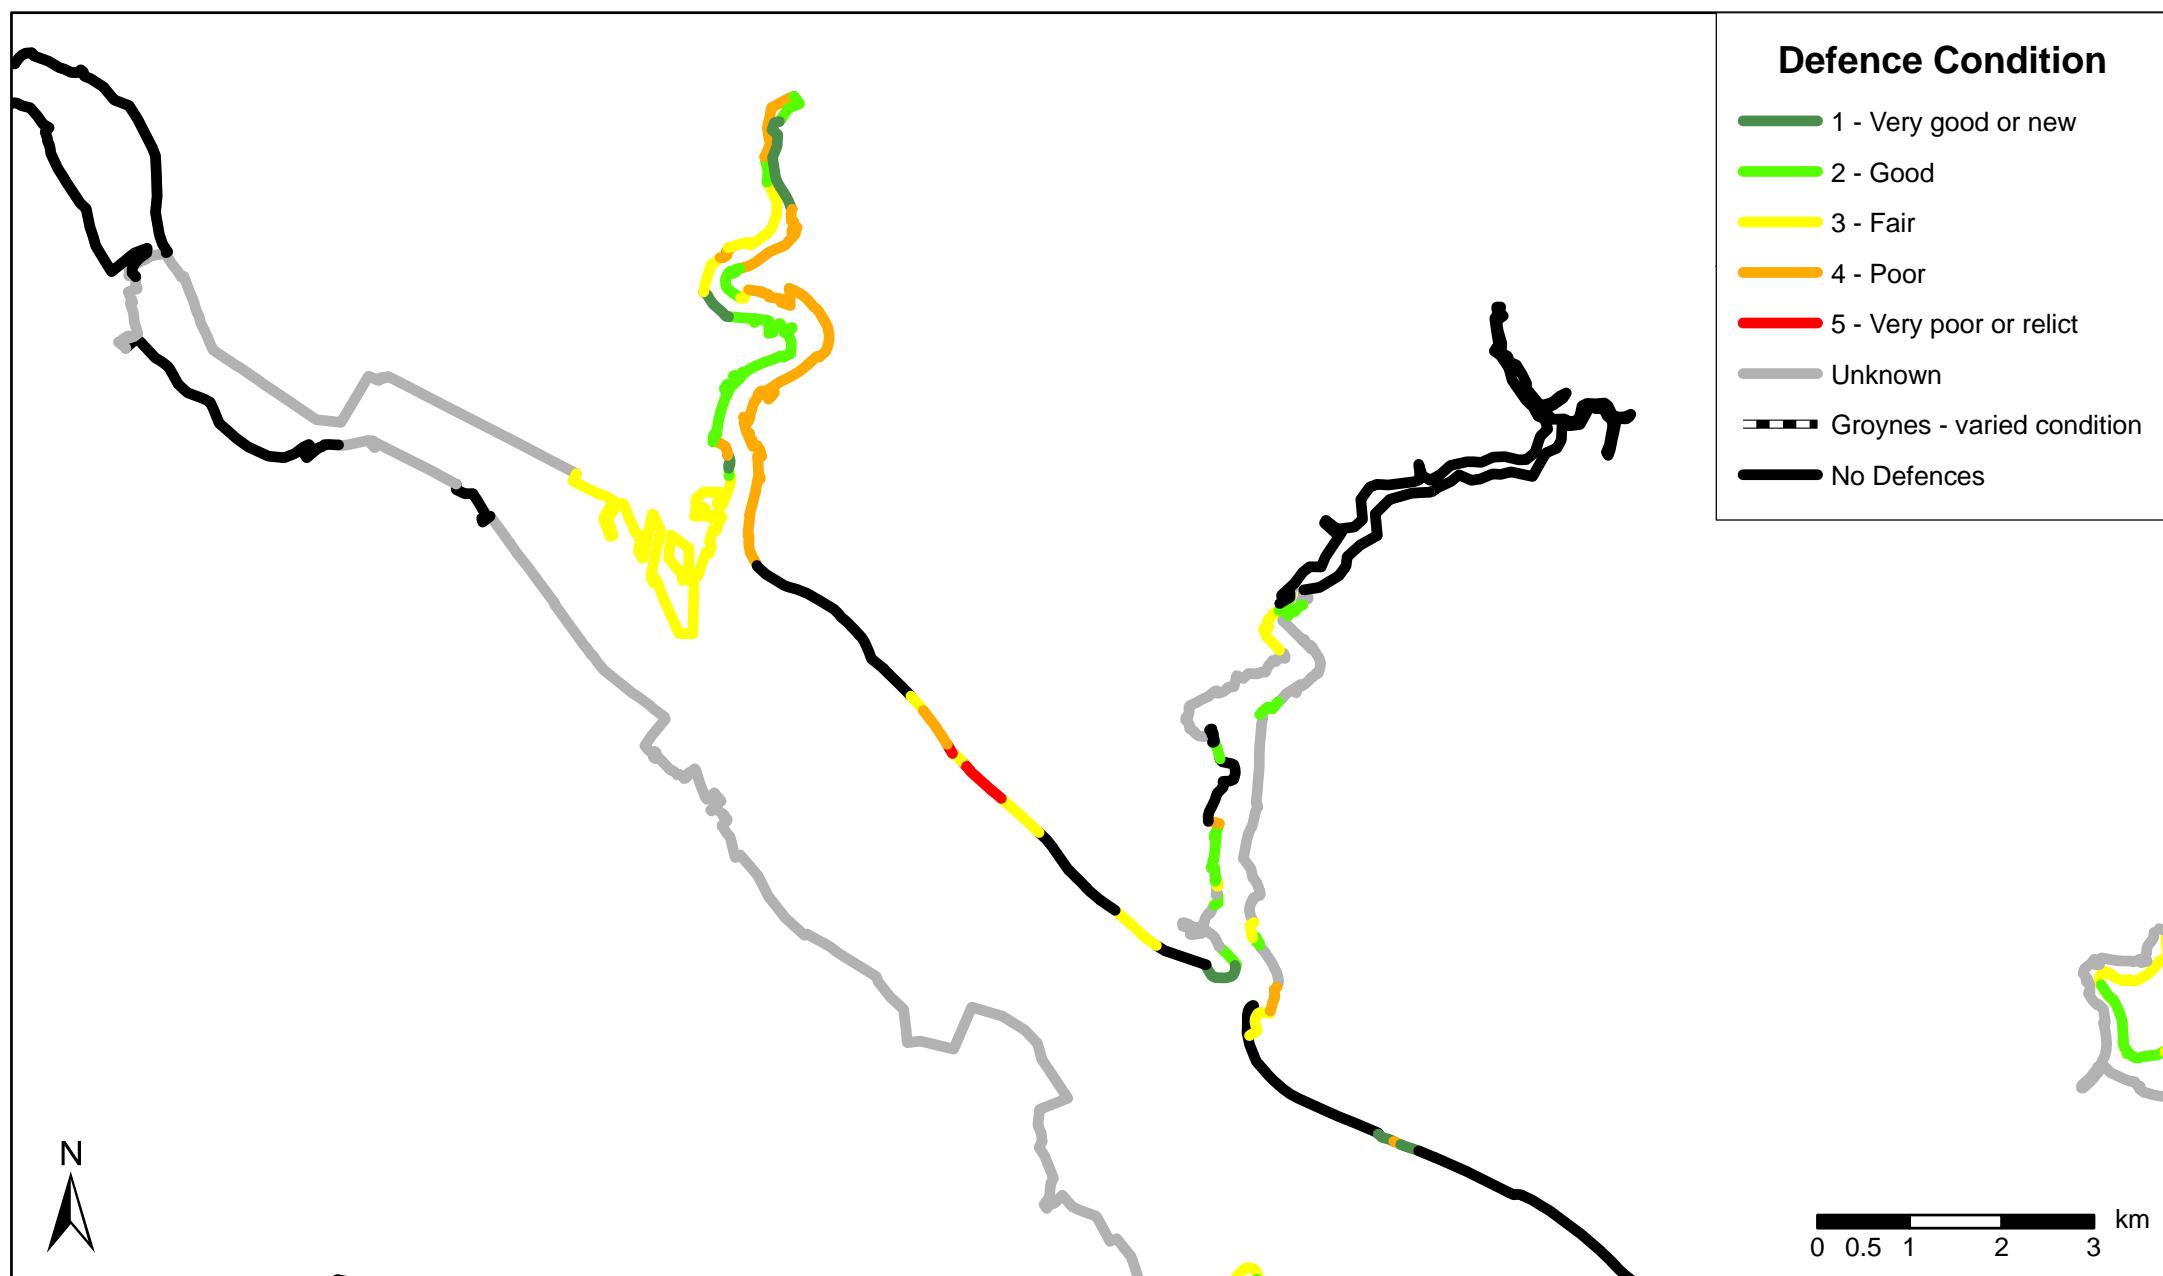

Groyne fields are shown seaward of shoreline defences
